DRAFT STORAGE AGREEMENT Between Western Municipal Water District and Cucamonga Valley Water District

This Storage Agreement (“Agreement”) is made on _____, 2024, by and between the Cucamonga Valley Water District (“CVWD”) and Western Municipal Water District (“Western Water”). CVWD and Western Water are herein collectively referred to as “the Parties” individually as “the Party”.

RECITALS

WHEREAS, the Chino Groundwater Basin (“Chino Basin”) is one of the largest subsurface storage aquifers in Southern California and has the potential to store large volumes of water for local use during dry periods; and

WHEREAS, a Judgment was entered in San Bernardino County Superior Court in 1978 that adjudicated rights to the groundwater and storage capacity within the Chino Basin and established a physical solution; and

WHEREAS, the Peace I Agreement and Peace II Agreement (together “Peace Agreements”) established further agreement and rules regarding storage; and

WHEREAS, the Peace II Agreement expires on December 31, 2030; and

WHEREAS, CVWD has groundwater pumping rights and storage rights within the Chino Basin; and

WHEREAS, Western Water was established by a vote of the people to be, among other things, the Metropolitan Water District of Southern California (Metropolitan) member agency providing service to retail water agencies, one of which (Jurupa Community Services District) also overlays the Chino Basin; and

WHEREAS, during a period of extreme drought, CVWD’s demands for imported water from Metropolitan were lower than minimum delivery reads on Metropolitan’s meter (Minimum Service Connection Flow), essentially resulting in deliveries of water beyond CVWD’s preference, hereafter referred to as “Minimum Flows Balance Water”; and

WHEREAS, the Inland Empire Utilities Agency (IEUA) voluntarily agreed to purchase the Surplus Water from Metropolitan during the months of April, May and June of 2016 and January, February and March of 2017, totaling 3,641.600 acre-feet of untreated Tier 1 water; and

WHEREAS, the IEUA and CVWD entered into an agreement (the “IEUA Agreement”) on February 26, 2016, establishing the terms for IEUA’s purchase of Minimum Flows Balance Water, payment

responsibilities, accounting of the water over time, and use of CVWD's storage account in the Chino Basin to store the water, and the IEUA Agreement was amended once on June 30, 2017, to extend the term to June 30, 2018; and

WHEREAS, within the 60 months allowed under the terms of the amended IEUA Agreement, IEUA determined that it wished to sell the water at a price that fully compensated IEUA for its costs and has worked in good faith to secure a buyer for the water; and

WHEREAS, after offering the Minimum Flows Balance Water for sale to IEUA's retail agencies at cost, Western Water was the only agency offering to purchase the water at IEUA's sale price; and

WHEREAS, IEUA notified Metropolitan of its intention to sell its Minimum Flows Balance Water to Western Water on August 29, 2023, in compliance with Section 4205 of Metropolitan's Administrative Code, and Metropolitan approved the transaction on September 11, 2023, without restrictions, but required notification of the transaction when it occurred so that it can be reported to its Board of Directors; and

WHEREAS, CVWD has faithfully maintained records on the losses associated with the Minimum Flows Balance Water and a total of 3,596.753 acre-feet remains after losses of 44.847 acre-feet are subtracted; and

WHEREAS, the Parties now desire to enter into this Agreement in order for CVWD to maintain the water in storage, now on behalf of Western Water, following Western Water's purchase from IEUA.

NOW, THEREFORE, the Parties hereto agree as follows:

SECTION 1: SALE OF STORED WATER FROM IEUA TO WESTERN WATER

- A. This Agreement shall not take effect unless and until CVWD and Western Water receives written notification from the IEUA confirming the sale and disposition of the Minimum Flows Balance Water to Western Water, including full execution of a purchase and sale agreement between IEUA and Western Water. The IEUA Board approved sale of the stored water which totals 3,596.753 AF to Western Water in the amount of \$2,572,535.76 on December 20, 2023.

SECTION 2: STORED WATER CREDITS

- A. Following Western Water's successful purchase of the Minimum Flows Balance Water contemplated by Section 1 of this Agreement, CVWD shall store and account for, an equivalent volume of Chino Basin groundwater to Western Water within CVWD's existing Excess Carryover Storage Account ("Western-Credited Stored Water").
- B. Western-Credited Stored Water shall be subject to losses normally assessed to Appropriative Pool storage accounts by Watermaster and any such losses shall be passed through to Western Water by CVWD and assessed to Western Water.

- C. Western Water shall be responsible for any incurred fees/assessments attributable to the volume of water stored under this Agreement. Any such fees/assessments will be passed through to Western Water by CVWD.
- D. CVWD shall provide Western Water with a written summary of the Western-Credited Stored Water balance (which shall include, at a minimum, prior water balance, water added, losses applied, transfers in/out and new water balance) within 30-days of the approved annual Chino Basin Watermaster Assessment package.
- E. During the term of this Agreement, should Western Water elect to sell the Western-Credited Stored Water, CVWD shall have a right of first refusal to purchase up to fifty percent (50%) of the water from Western Water at the same rate Western Water paid at the time of purchase, plus any associated costs assessed and after accounting for any losses. Should CVWD decline to purchase the water using its right of first refusal, Western Water may offer the Western-Credited Stored Water to other third-party buyers. If such an offer to a third-party buyer is made and is denied by the third party, CVWD may request to purchase the stored water at the identical price and terms under which Western Water is offering the stored water to the third-party buyer. The purchase of the Western-Credited Stored Water shall be at CVWD's sole discretion.
- F. In the event that Western Water desires to transfer all or any portion of its Western-Credited Stored Water to another party and CVWD elects not to exercise the right of first purchase per Section 2.E., Western Water shall notify CVWD in writing of the requested transfer no less than 30-days prior to the proposed transfer being filed with Watermaster. Thereafter, CVWD shall, in good faith, file the necessary paperwork required by Watermaster within 30-days of receiving a written request from Western Water; provided, however, that Western Water shall cooperate in supplying CVWD with all necessary data and information that may be needed to complete the Watermaster paperwork, and provided further that CVWD shall have no responsibility, liability, duty to defend, or any other obligation in relation to the Watermaster consideration, potential third-party protest, or any other factors that are out of CVWD's control affecting any proposed transfer by Western Water. Western Water shall be solely responsible for any and all costs and expenses related to a transfer.
- G. The Parties shall confer at least 90 days prior to any termination or expiration of this Agreement. Within 90 days prior to any termination or expiration of this Agreement, CVWD shall notify Western Water of the balance of Western-Credited Stored Water, which shall remain Western Water's asset, subject to Watermaster's requirements. Subject to Watermaster approval, Western Water may request transfer of any remaining balance of Western-Credited Stored Water into Western Water's dedicated Chino Basin water storage account or request transfer of the water to another Chino Basin party. Western Water shall make good faith efforts to ensure that all Western-Credited Stored Water is removed from the CVWD storage account at least 30 days prior to any termination or expiration of this Agreement. In the event any Western-Credited Stored Water remains in the CVWD storage account within 29 days or less of the termination or expiration date, the Parties shall meet and confer again in good faith to develop a mutually agreeable plan for the disposition of said water.
