## ECONOMIC UPDATE

---

As of March 31, 2025

Markets entered 2025 with strong momentum following two consecutive years of impressive equity gains. However, sentiment shifted quickly as a new policy direction began to unfold in Washington. The inauguration of President Trump, along with the confirmation of key cabinet members, marked the start of significant changes to U.S. trade and economic policy. Among the most impactful developments were newly introduced tariffs, aimed at narrowing the trade deficit and supporting domestic manufacturing. These measures became a central focus for investors, raising concerns about global supply chains, profit margins, and the broader economic outlook.

As the quarter progressed, uncertainty surrounding the implementation and impact of these policies took center stage. Market participants questioned how companies would respond—whether investment plans would be delayed, hiring would slow, or operations would need to be restructured. Rising costs and evolving trade dynamics increased risk sensitivity across markets. Still, there was some cautious optimism that these policies could deliver long term structural benefits for the U.S. economy.

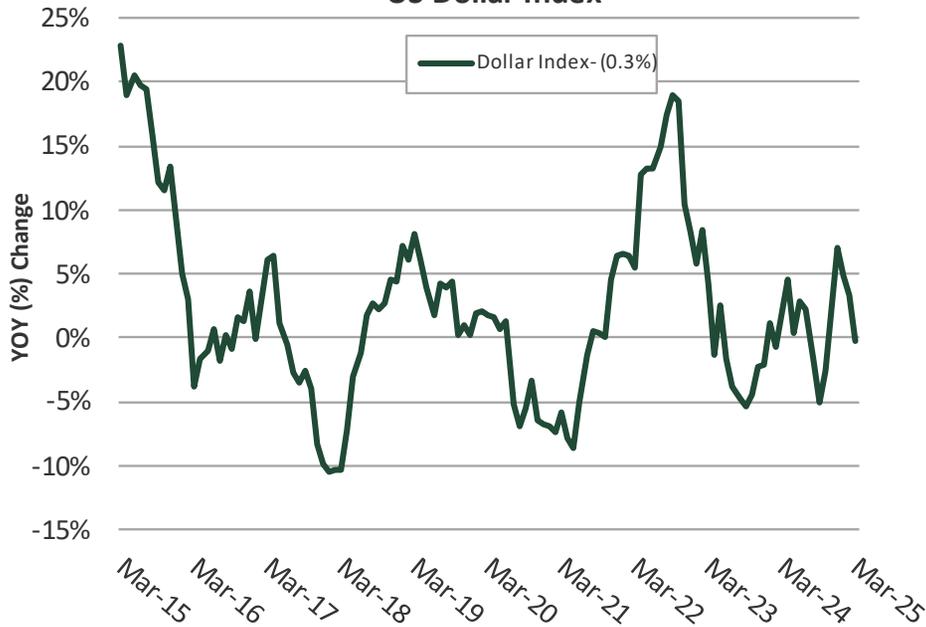

This mixed sentiment played out in market performance. After two years of 25% gains, the S&P 500 drifted for much of the quarter before closing down 4.3%. In bonds, the 10 year U.S. Treasury yield fell from 4.76% to 4.21%, signaling a more defensive tone among investors. Lower yields supported fixed income portfolios, boosting total returns across many core bond strategies. The U.S. Dollar Index declined 3.9%, easing pressure on international assets and improving returns for U.S.-based investors in foreign markets. Developed international equities gained 6.2%, supported by currency translation effects, attractive relative valuations, and renewed interest in geographic diversification amid U.S. policy uncertainty.

This shift in sentiment became more pronounced following the April 2 announcement of reciprocal tariffs, which marked a clear turning point in market tone. Equity markets began to swing more sharply, while gold and U.S. Treasuries saw increased demand as investors grew uneasy about global trade stability and the direction of policy. The response reflected more than concern over tariffs—it signaled deeper unease about rising international tensions and a lack of clarity around future decisions. In the near term, volatility is likely to remain elevated as markets continue to react to shifting headlines and evolving fiscal signals.

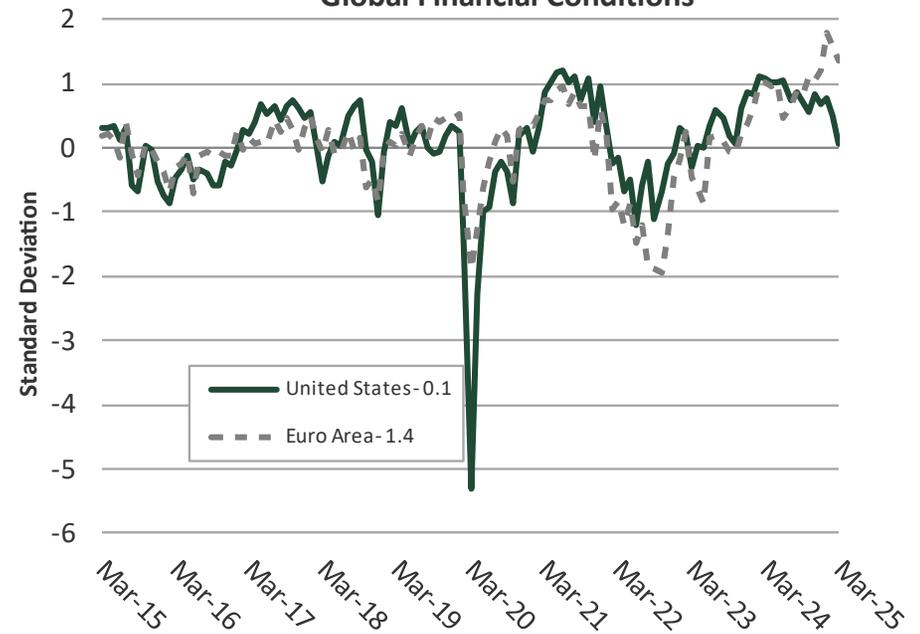

Looking ahead, policy developments will remain a key influence on market direction. While uncertainty persists, opportunities are emerging across asset classes. Resilient consumer demand, easing interest rates, and improving valuations are creating a more supportive backdrop for long term investors. International markets may benefit from a weaker dollar, while domestic sectors with strong fundamentals could offer relative stability. Staying diversified, focused on quality, and adaptable to changing conditions will be essential. We will continue to navigate this environment with discipline and care, working to manage risk and capture opportunities in pursuit of your long term goals.

As of March 31, 2025

US Dollar Index

Global Financial Conditions

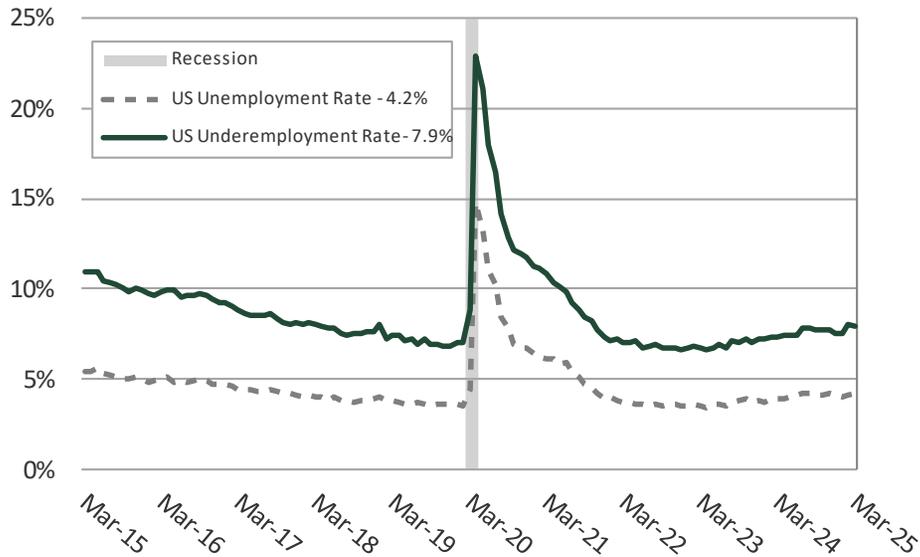

Source: Bloomberg Financial Condition Indices

The global economy expanded at a moderate pace in the first quarter of 2025, with the IMF maintaining its full-year growth forecast at 3.3%, unchanged from its January estimate. Ahead of new U.S. tariff announcements in late March, the IMF had raised its U.S. growth outlook to 2.7% for the year, citing solid job gains and stronger than expected business investment. Growth in emerging markets remained robust, with India projected to expand by 6.5% and China by 4.6%. India’s performance is being supported by domestic demand and stable macroeconomic conditions, while China’s outlook reflects ongoing fiscal support despite continued pressure in its property sector. The euro area lagged behind, with growth forecast at just 1.0% due to weak consumer activity and lingering energy concerns.

Against this backdrop, central banks held interest rates steady throughout the quarter, following a round of easing in late 2024. The Federal Reserve kept its benchmark rate at 4.25% to 4.50%, signaling a wait-and-see approach as inflation continues to slow. The OECD projects G20 inflation will ease to 3.8% this year, down from 5.3% in 2024. Meanwhile, the U.S. dollar weakened nearly 4% over the quarter, reversing early strength after the tariff news shifted market expectations. Looking ahead, central banks will need to carefully weigh policy decisions as trade tensions and fiscal shifts complicate the global outlook.

As of March 31, 2025

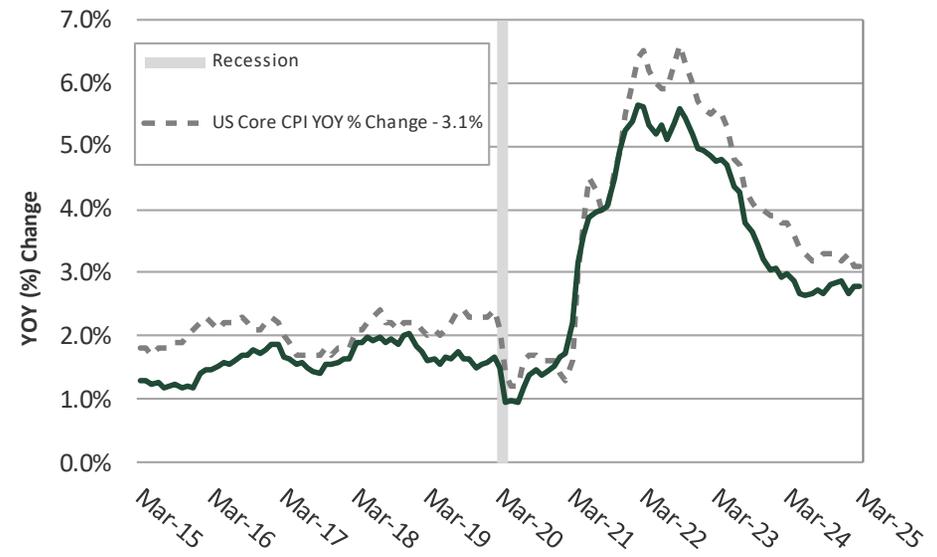

### US Unemployment Rate

Source: US Department of Labor

The U.S. economy added 228,000 jobs in March, showing steady momentum despite signs of cooling in some areas. Hiring was led by health care, retail, and transportation and warehousing, according to the Bureau of Labor Statistics. The unemployment rate ticked up to 4.2% from 4.1% in February, as more people entered the labor force. The labor force participation rate held at 62.5%, still below its pre-pandemic level. A broader measure of labor slack, the U-6 rate, rose to 7.9%. Average hourly earnings rose 0.3% for the month and 3.8% from a year ago, pointing to a gradual slowdown in wage growth.

### US Inflation

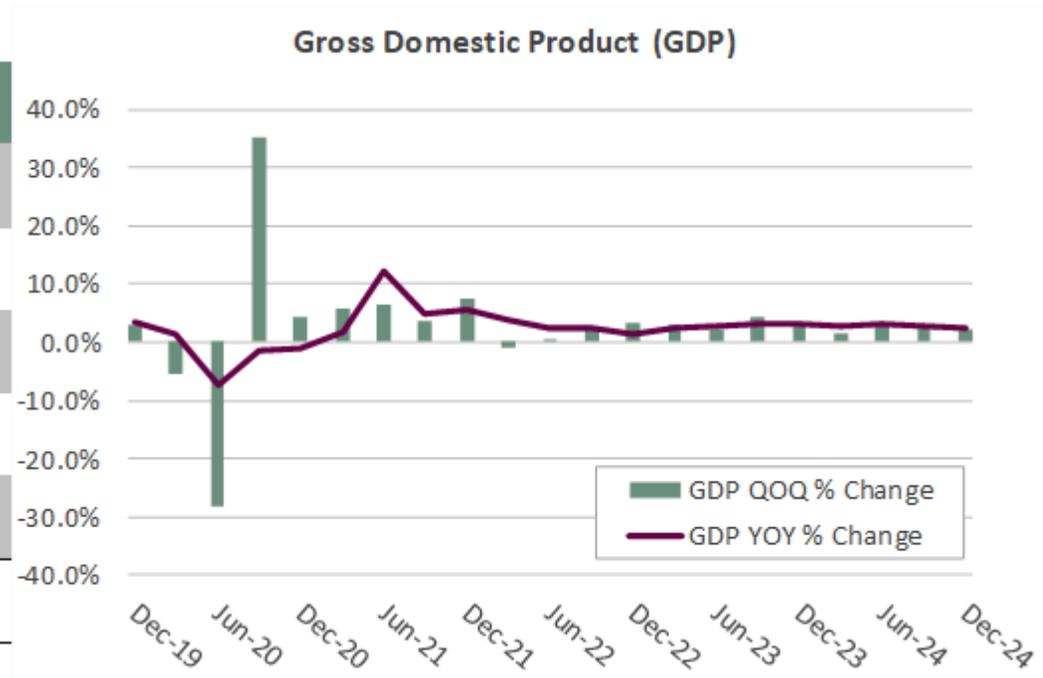

Inflation remained moderate in February, the latest month available. Consumer prices rose 0.2% from January and 2.8% over the past year. Core inflation, which strips out food and energy, rose 0.2% on the month and 3.1% from a year earlier. Long-term Treasury yields moved higher as investors reacted to sticky inflation and new import tariffs announced by the Trump administration. These policies have stirred concerns about future price pressures and global trade, complicating the Federal Reserve's path forward as it balances inflation risks against slower economic growth.

# GROSS DOMESTIC PRODUCT (GDP)

As of March 31, 2025

Components of GDP	3/24	6/24	9/24	12/24

Source: US Department of Commerce

According to the third estimate, fourth quarter GDP increased at an annualized rate of 2.4 percent, revised up 0.1 percentage point from the second estimate. Growth continues to be powered by consumer spending and government spending, partly offset by a decrease in investment. Imports also decreased. Real GDP increased 2.8 percent in 2024. The consensus projection calls for 1.2% growth for the first quarter and 2.0% for the full year 2025.

Source: Bloomberg

The MSCI All Country World Index declined 1.3%<sup>1</sup> during the quarter. Developed markets outside the U.S. rose 6.2%<sup>1</sup>, while emerging markets gained 2.9%<sup>1</sup>. U.S. large cap stocks underperformed with a return of -4.3%<sup>2</sup>.

A 3.9% weakening of the .US. Dollar Index contributed to the outperformance of developed markets. Top contributors included Germany (15.5%)<sup>1</sup>, Switzerland (11.4%)<sup>1</sup>, and France (10.3%)<sup>1</sup>. Japan and Canada lagged with gains of 0.3%<sup>1</sup> and 1.1%<sup>1</sup>, respectively. In emerging markets, China rose 15.0%<sup>1</sup>, offset by declines in India (-3.0%)<sup>1</sup> and Taiwan (-12.6%)<sup>1</sup>.

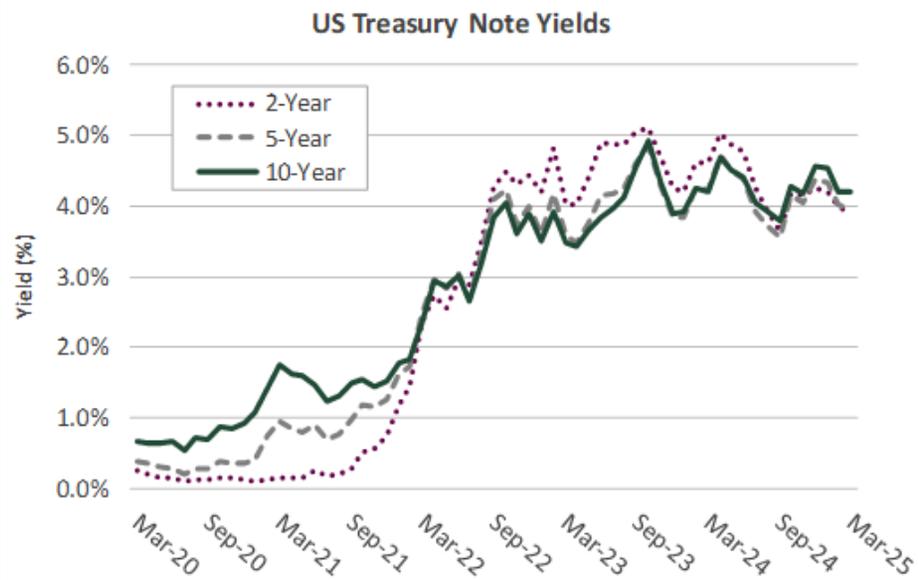

Deteriorating U.S. market breadth, noted last quarter, continued to weaken. The percentage of S&P 500 companies trading above their 200-day moving averages fell to 43% from 54%. The index was dragged down by the MAG7, which had an average decline of 15.7% for the group. The S&P 500 Equal Weight Index also dropped, though more modestly at -0.6%. Within large caps, energy led with a return of 10.2%<sup>1</sup>, followed by health care at 6.5%<sup>1</sup> and consumer staples at 5.0%<sup>1</sup>. Mid and small caps underperformed with returns of -6.1%<sup>1</sup> and -8.9%<sup>1</sup>, respectively.

After quarter end, on April 2, President Trump announced the details of his reciprocal tariff policy, sparking a sharp rise in market volatility. Early in April, the S&P 500 Volatility Index climbed as high as 60, while the S&P 500 Index fell nearly 14% from the end of March. The Chandler team is closely monitoring developments and market response.

Source: Bloomberg

Source: Bloomberg

The U.S. Federal Reserve (Fed) met in January and March, keeping the Fed Funds rate unchanged at both meetings. In March, the Fed updated its Summary of Economic Projections (SEP), showing slightly lower GDP growth, a higher unemployment rate, and higher inflation. The projected range for the Fed Funds rate in 2025 and 2026 moved slightly higher, suggesting fewer cuts ahead.

Yields across the U.S. Treasury curve declined. The 2-year yield dropped 0.36% to 3.89%, while the 10-year yield declined 0.37% to 4.21%. The spread between the 2-year and 10-year Treasuries remained relatively stable and ended the quarter at 0.32%.

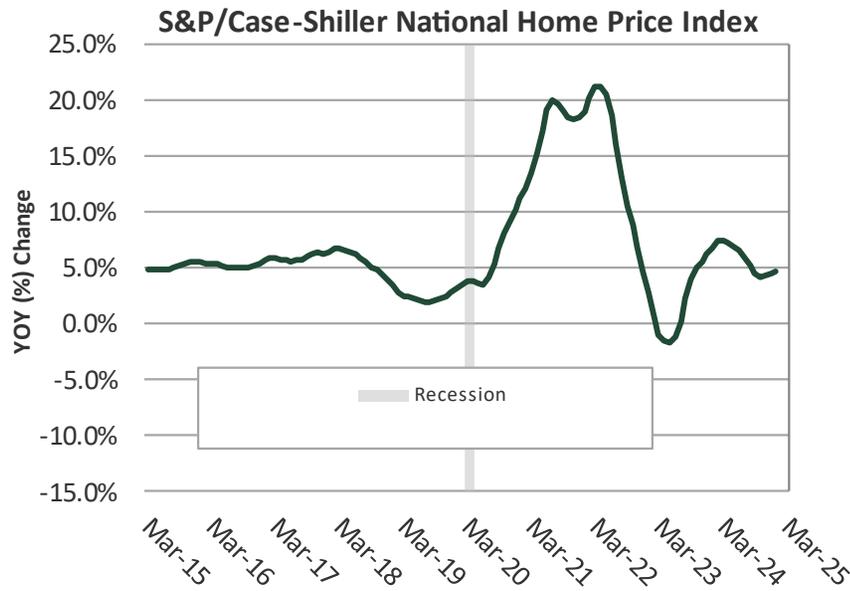

Corporate bond spreads, a measure of credit risk, widened during the quarter. Investment grade spreads rose 0.15% to 0.97%<sup>1</sup>, and high yield spreads increased 0.63% to 3.55%<sup>2</sup>. While still low by historical standards, both were near their tightest levels in the past ten years. The widening may signal a shift in investor appetite for credit risk.

Yields in Japan continued to rise, with the 10-year government bond yield up 0.39% to 1.49%, its highest since 2009. The German 10-year Bund yield rose 0.37% to 2.74%. In China, the 10-year bond yield increased 0.14% to 1.82%, up from the prior quarter but down from 2.30% a year ago. Chinese yields continued their fall following quarter end, reflecting expectations for slower growth and rising risks tied to the escalating trade tensions with the U.S.

Source: NCREIF

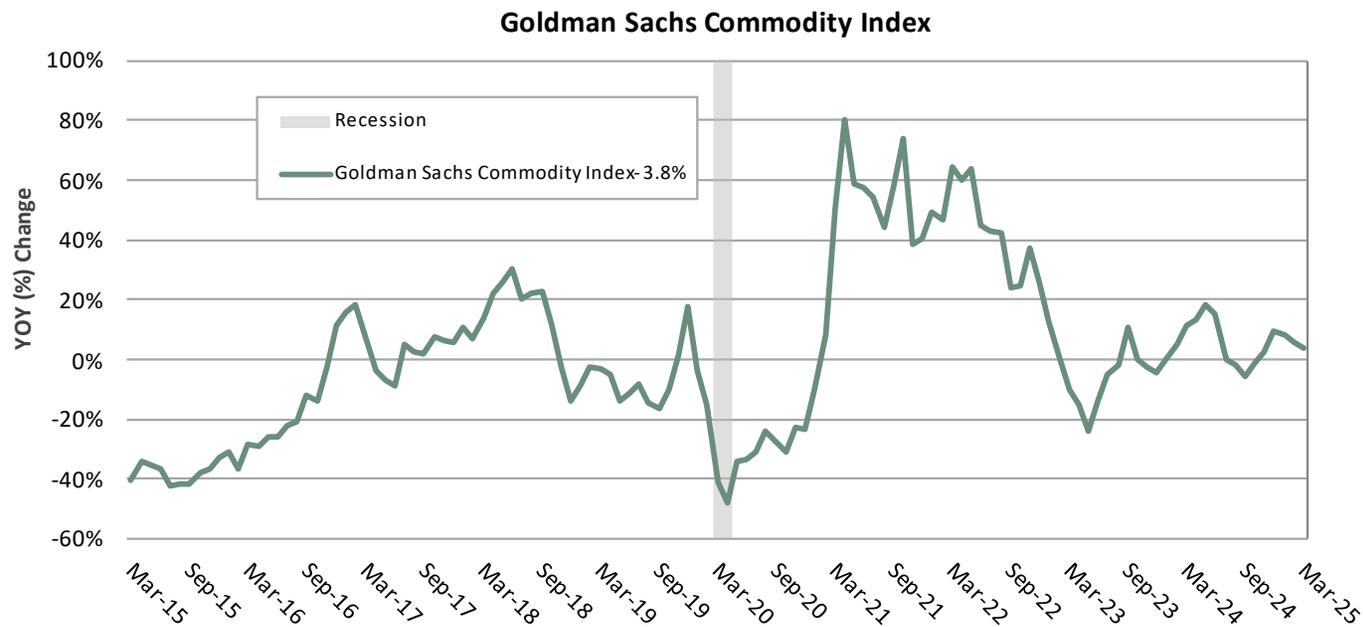

Real Estate Investment Trusts (REITs) posted modest gains in the first quarter of 2025. Global REITs returned 1.5%<sup>2</sup>, supported by lower interest rates and improved investor confidence. U.S. REITs rose 0.8%<sup>1</sup>, while international REITs performed best, gaining 3.3%<sup>2</sup> due to a weaker U.S. dollar, which increased the value of foreign investments. In comparison, the S&P 500 fell 4.3% as the market reacted to new tariffs, inflation concerns, and slower consumer spending.

Although quarterly returns were positive, March was more challenging for REITs. The FTSE Nareit All Equity REITs Index declined 2.4%<sup>1</sup>, though broader stock indexes fell even more. The 10-year Treasury yield ended the month at 4.21%, nearly unchanged, but well below its January peak of 4.79%. That drop supported REIT valuations earlier in the quarter. Within the REIT market, sectors like telecommunications, gaming, and health care led performance, while lodging, data centers, and industrial properties lagged. As of March 31, equity REITs offered a dividend yield of about 4%<sup>1</sup>. With steady income and attractive pricing, REITs continue to be a compelling choice for investors seeking diversification and income in today's uncertain environment.

The S&P GSCI broad commodity index rose 4.9%<sup>1</sup> during the quarter, supported by strong gains in energy, industrial metals, and precious metals. The energy subindex, which holds the largest weight at 57%, increased 4.8%. West Texas Intermediate crude oil was flat at \$71, while natural gas extended its rally, rising 13.4% to \$4.12. Industrial metals gained 5.2%<sup>1</sup>, driven by a 25.0% jump in copper prices to \$5.03. While demand from electric vehicles remains strong, part of the rise may reflect stockpiling ahead of potential tariffs.

Precious metals led commodity performance, with the subindex up 18.2%<sup>1</sup>. Silver increased 18.4% to \$34.61, while gold surpassed \$3,000 and ended the quarter at \$3,123, up 18.2%. Continued demand from global central banks and gold’s role as a safe haven supported the rally. The agriculture and livestock subindex posted a 1.3%<sup>1</sup> gain. Cocoa prices fell 33.3%, giving back most of last quarter’s gains after a forecasted supply surplus for 2025. In contrast, coffee rose 21.6%, driven by supply concerns as Vietnam faces new U.S. tariffs.

With broad-based gains across major categories, commodities continue to show their value in a diversified portfolio. In addition to return potential, they offer a meaningful hedge against inflation and market volatility, especially during periods of heightened uncertainty.

## IMPORTANT DISCLOSURES

Western Municipal Water District VEBA Account | Account #254 | As of March 31, 2025

2025 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc (“IDS”), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client’s Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

ICE permits use of the ICE indices and related data on an “as is” basis; ICE, its affiliates and their respective third party suppliers disclaim any and all warranties and representations, express and or implied, including any warranties of merchantability or fitness for a particular purpose or use, including the indices, index data and any data included in, related to, or derived therefrom. Neither ICE data, its affiliates or their respective third party providers guarantee the quality, adequacy, accuracy, timeliness or completeness of the indices or the index data or any component thereof, and the indices and index data and all components thereof are provided on an “as is” basis and licensee’s use it at licensee’s own risk. ICE data, its affiliates and their respective third party do not sponsor, endorse, or recommend chandler asset management, or any of its products or services.

This report is provided for informational purposes only and should not be construed as a specific investment or legal advice. The information contained herein was obtained from sources believed to be reliable as of the date of publication, but may become outdated or superseded at any time without notice. Any opinions or views expressed are based on current market conditions and are subject to change. This report may contain forecasts and forward-looking statements which are inherently limited and should not be relied upon as indicator of future results. Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgment.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody’s, s&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities (“MBS”) reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody’s and Fitch respectively.

- **US Small Cap Stocks - Morgan Stanley Capital International (MSCI) Small Cap 1750** - The MSCI Small Cap 1750 is a market capitalization weighted index that measures the performance of small capitalization U.S. stocks.
- **US Mid Cap Stocks - Morgan Stanley Capital International (MSCI) Mid Cap 450** - The MSCI Mid Cap 450 is a market capitalization weighted index that measures the performance of mid-capitalization U.S. stocks.
- **US Large Cap Stocks - Standard & Poor's 500** - The S&P 500 is a market value weighted index of 500 large capitalization stocks. The 500 companies included in the index capture approximately 80% of available U.S. market capitalization.
- **International Stocks - Morgan Stanley Capital International (MSCI) EAFE** - The MSCI EAFE International Equity Index is a market capitalization weighted index that captures international equity performance of large and mid-cap stocks in the developed stock markets of Europe, Australasia, and the Far East.
- **Emerging Market Stocks - Morgan Stanley Capital International (MSCI) Emerging Markets** - The MSCI Emerging Markets Index is a market capitalization weighted index that captures equity performance of large and mid-cap stocks across emerging market countries.
- **U.S. Real Estate - Morgan Stanley Capital International (MSCI) REIT** - The MSCI US REIT Index is a free float-adjusted market capitalization index that is comprised of equity REITs. It represents about 99% of the US REIT universe and securities are classified in the REIT sector according to the Global Industry Classification Standard (GICS®). It excludes Mortgage REIT and selected Specialized REITs.
- **International Real Estate - S&P Developed Ex-US Property** - The S&P Developed Ex-US Property Index is a market capitalization weighted index that captures the performance of a universe of publicly traded property companies based in developing countries outside of the US. The companies included are engaged in real estate related activities, such as property ownership, management, development, rental and investment.
- **US Core Bonds - ICE BofA US Corporate, Government, Mortgage** - The ICE BofA US Corporate, Government, Mortgage index is a broad measure of US investment grade bond performance, including US Treasuries, agencies, investment-grade corporates and mortgage securities.
- **US High Yield Bonds - ICE BofA US High Yield** - The ICE BofA High Yield Bond Index measures the market of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds.
- **International Bonds - Bloomberg Barclays Global Aggregate ex-USD Total Return Index Value Unhedged USD - Index from 2/1/2013 - current**. This index measures the performance of global investment grade debt from 24 local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. S&P Citigroup International Govt Bond - Index from 1/1/2009 - 1/31/2013. This index measures the performance of sovereign bonds of non-U.S. developed countries.
- **Diversified Commodities - S&P GSCI Commodity Index** - The S&P GSCI Commodity Index is a world production-weighted measure of general commodity price movements and inflation in the world economy. It consists of a basket of physical commodity futures contracts.

*Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgement.*

*All investments contain risk and may lose value. Fixed income investments are subject to interest rate, credit, and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise.*

*Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates. International: Non-US markets may be more volatile due to a variety of factors including less liquidity, transparency and oversight of companies and assets. Values of non-US investments may fluctuate due to changes in currency exchange rates. Non-US companies are also subject to risks that come with political and economic stability that may affect their respective countries. These risks may be greater in emerging market countries. Equities: Investments on equities are subject to risks from stock market fluctuations that occur in response to economic and business developments.*

Benchmark	Disclosure
<p>40% ICE BofA US Corporate, Government and Mortgage Index, 35% S&amp;P 500 Index and 25% MSCI EAFE</p>	<p>The S&amp;P 500 is a market value weighted index of 500 large-capitalization stocks. The 500 companies included in the index capture approximately 80% of available US market capitalization.</p> <p>The MSCI EAFE International Equity Index is a market capitalization weighted index that captures international equity performance of large- and mid-cap stocks in the developed stock markets of Europe, Australasia, and the Far East.</p> <p>The ICE BofA US Corporate, Government &amp; Mortgage Index tracks the performance of US dollar denominated investment grade debt publicly issued in the US domestic market, including US Treasuries, quasi-governments, corporates, covered bonds and residential mortgage pass-throughs. Non-residential mortgage collateralized debt such as commercial mortgage backed securities and asset backed securities are excluded from this index, as are all collateralized mortgage obligations. Most qualifying securities must have an investment grade rating (based on an average of Moody's, S&amp;P and Fitch). They must also have at least one year remaining term to final maturity, at least 18 months to final maturity at point of issuance and a fixed coupon schedule. Amounts outstanding for qualifying US Treasuries must be at least \$1 billion; US agencies, foreign governments, supranationals, corporates and covered bonds must have at least \$250 million outstanding. Qualifying residential mortgage pass-through securities include fixed rate securities publicly issued by US agencies. 30-year, 20-year and 15-year fixed rate mortgage pools must have at least one year remaining term to final maturity and a minimum amount outstanding of at least \$5 billion per generic coupon and \$250 million per production year within each generic coupon.</p>
