FINANCIAL REPORT**

For the fiscal year ended June 30, 2023

ANNUAL COMPREHENSIVE FINANCIAL REPORT FOR THE FISCAL YEAR ENDED JUNE 30, 2023

Prepared by: Western Municipal Water District's Finance Department

WESTERN MUNICIPAL WATER DISTRICT

Western Municipal Water District (Western Water) is securing your water supply for today and tomorrow. Western Water is one of the largest public agencies in Riverside County providing water, wastewater (sewer), and recycled water services to nearly 1 million people, both wholesale and retail customers, across 527-square miles in western Riverside County.

MISSION

To provide water supply, wastewater disposal, and water resource management to the public in a safe, reliable, environmentally sensitive, and financially responsible manner.

VISION

To enhance Western Water's leadership role by integrating the best-in-business processes and business systems while developing a leading-edge workforce that continuously creates greater efficiency and value for our customers.

VALUES

Service excellence

Exceeding the expectations of all customers and stakeholders.

Public trust, accountability, and transparency

Maintaining a standard of exceptional integrity, honor, and respect through open communication and accessibility.

Efficiency

Ensuring that our dedication to efficiency standards extends across Western Water and beyond water resources, providing guidance to all financial and operational decisions.

Environmental stewardship

Promoting responsible and sustainable practices in water and other natural resources.

Water supply reliability

Securing a safe and stable water supply through diverse source strategies and innovative water resource management.

Fiscal responsibility and value

Ensuring the financial stability of Western Water and value to the customer through sound fiscal management and disciplined decision making.

Employee empowerment

Fostering an environment where organizational effectiveness is valued, mutual respect is paramount, and employee support and development is fundamental to our core culture.

Innovation

Continuously seeking and introducing new ideas, services, and opportunities in all that we do. We thrive on our ability to find solutions and possibilities through the ingenuity and creativity of our team.

Powered by water. Driven by service.

WESTERN WATER

Powered by water. Driven by service.

Western Water invests in reliable projects to secure water supply for our customers and the region. These investments focus on securing new water rights, stormwater capture, water wheeling from outside our service area, water recycling and groundwater desalting. We believe that reliable water resources are imperative for those not-so-rainy days and years that are common to Southern California.

ANNUAL COMPREHENSIVE
FINANCIAL REPORT
2022-23

Craig D. Miller
General Manager

MESSAGE FROM THE GENERAL MANAGER

January 19, 2024

To the Board of Directors and customers served by Western Water,

I am pleased to present Western Municipal Water District's (Western Water) Annual Comprehensive Financial Report for the fiscal year ended June 30, 2023. Our Finance Department prepared the report following guidelines recommended by the Governmental Accounting Standards Board (GASB) and generally accepted accounting principles (GAAP). Western Water prides itself in using customer revenue responsibly to build, monitor, and maintain the systems that deliver water and wastewater (sewer) service today and for future generations.

Western Water is responsible for the accuracy of the presented data and the completeness and fairness of the presentation, including disclosures. We believe that the data, as presented, is accurate in all material respects and that it is presented in a manner that provides a fair representation of Western Water's operations and financials. This report includes all disclosures needed to enhance your understanding of our financial condition.

As required by GAAP, this report has a narrative introduction, overview, and analysis accompanied by the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This transmittal letter is designed to complement the MD&A, which should be read in conjunction with the basic financial statements. The MD&A is found immediately following the report by the independent audit firm.

Western Water's basic financial statements have been audited by Clifton Larson Allen, LLP, a firm of licensed certified public accountants. The goal of the independent audit is to provide reasonable assurance that the basic financial statements of Western Water for the fiscal year ended June 30, 2023, are free of material misstatement.

The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall basic financial statement presentation. The independent auditors concluded that there was a reasonable basis for rendering an unmodified opinion that Western Water's basic financial statements for the fiscal year ended June 30, 2023, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

Sincerely,

Craig D. Miller
General Manager

REPORTING ENTITY AND ITS SERVICES

WESTERN WATER'S SERVICE AREA

Western Municipal Water District (Western Water) is one of the largest public agencies in Riverside County, providing water, wastewater, and recycled water services to nearly a million people, both wholesale and retail customers, who live, work and play within 527 square miles in one of California's most populous regions. Within Western Water's service boundaries are the cities of Canyon Lake, Corona, Eastvale, Jurupa Valley, Lake Elsinore, Murrieta, Norco, Riverside, and Temecula. Western Water provides imported water to its service area as a supplement to the region's local water supply.

The assessed valuation of Western Water's service area has grown from less than \$150 million when formed in 1954 to approximately \$136 billion in this past fiscal year. The population of Riverside County is about 2.5 million, of which Western Water both directly and indirectly serves approximately 1,011,300 people - or 40 percent of the county's population.

WESTERN WATER'S AUTHORITY

Western Water was formed by voters on January 19, 1954, under the Municipal Water District Act of 1911, to distribute supplemental water purchased from The Metropolitan Water District of Southern California (MWD) to a growing western Riverside County. Before Western Water's creation, the local water supply was primarily groundwater wells that would become insufficient to support the growing region's water demands.

Western Water is authorized to acquire, distribute, store, treat, recycle, recapture, and salvage any water (including sewage) for the beneficial use of Western Water, its residents within the service area, or the owners of rights to water within Western Water's boundaries.

The Municipal Water District Act of 1911 authorizes Western Water to exercise the power of eminent domain; to levy and collect taxes; to fix, revise and collect rates or other charges for the delivery of water, to use facilities or property, or provision for service; and to fix in each fiscal year a water and/or wastewater standby charge on land within the boundaries of Western Water to which water and wastewater services are made available by Western Water. Western Water may also issue bonds, borrow money, and incur debt.

REPORTING ENTITY AND ITS SERVICES

GOVERNANCE

Western Water is a quasi-governmental agency (Special District) of the state of California. Western Water is not regulated by the Public Utilities Commission, but instead is governed by a body of five directors who are publicly elected for a four-year term from comparably sized divisions based on population.

Since the year of its inception, Western Water has been a member of MWD, which is a cooperative organization of 26 cities and water agencies that are responsible for providing imported water to arid Southern California. Western Water has one representative on the MWD Board.

Western Water employs 152 full-time staff under the direction of the board-appointed general manager. Western Water's general manager is also a court-appointed member of the water master committees with responsibilities for reporting compliance with water quality and quantity provisions of court orders regarding water rights issues in the Santa Ana River watershed and the San Bernardino groundwater basin area.

WATER SERVICES

Western Water serves approximately 25,000 retail, residential and commercial accounts and eight water agencies and cities with water from both the Colorado River and the State Water Project - purchased from MWD - and from local sources. In fiscal year 2023, Western Water delivered 75,701 acre-feet of water in its retail and wholesale service area (please refer to Tables VIII and IX in the Statistical section for additional information). This is equal to about 25 billion gallons. Approximately 62 percent of the purchased water delivered was potable water (drinking water); the balance was non-potable or raw water. Western Water delivered 71 percent of its water to wholesale customers and the rest to direct customers. Wholesale customers that buy water from Western Water and in turn sell the water to their own customers are Box Springs Mutual Water Company, the cities of Corona and Norco, Eagle Valley Mutual Water Company, Elsinore Valley Municipal Water District, Jurupa Community Services District, Rancho California Water District, and Temescal Valley Water District.

ARLINGTON DESALTER

The only potable water treatment facility owned and operated by Western Water is the Arlington Desalter. The Arlington Desalter is a 7.2 million-gallon per day (MGD) reverse osmosis water treatment plant that produced 3,987 acre-feet of high-quality drinking water that was made available for delivery to Jurupa Community Service District, the City of Norco, the City of Corona and Western Water for the fiscal year, removing millions of pounds of salts from brackish (salty) groundwater in the Arlington Groundwater Basin. The salt-laden waste is sent to the Orange County Sanitation District for treatment and discharge to the ocean. The annual revenue for the Arlington Desalter for the fiscal year was \$4.5 million.

REPORTING ENTITY AND ITS SERVICES

RETAIL WATER SERVICES

Western Water supplies water directly to approximately 25,000 residential, commercial, and agricultural users in the communities of El Sobrante, Lake Mathews, March Air Reserve Base, Mission Grove, Orangecrest, Rainbow Canyon, Temescal Creek, Woodcrest, and portions of the cities of Riverside and Murrieta. The Murrieta service area, unlike most of Western Water's retail service area, has its own local groundwater wells that are supplemented by imported water supplies.

Arlington Desalter reverse osmosis membranes

Reverse osmosis (RO) system during a RO membrane change out at the Arlington Desalter

SEWER AND RECYCLED WATER SERVICES

WESTERN WATER RECYCLING FACILITY

Western Water owns and operates the Western Water Recycling Facility (WWRF), which provides wastewater collection and treatment for the March Air Reserve Base and nearby residential and commercial customers located in portions of the city and county of Riverside. WWRF has a 3 MGD capacity and is currently operating at about 1.5 MGD.

WWRF provides wastewater treatment services for about 1,800 customers including the March Air Reserve Base and several industrial customers. The treated wastewater from WWRF is used in Western Water's recycled water system. Supplemented with non-potable local groundwater and surface water from the Colorado River Aqueduct, the tertiary treated recycled water from WWRF is used by customers to irrigate landscaping and agriculture.

WESTERN RIVERSIDE COUNTY REGIONAL WASTEWATER AUTHORITY'S TREATMENT PLANT

Western Water is one of the five member agencies comprising the Western Riverside County Regional Wastewater Authority (WRCRWA). Since 1998, Western Water has been the contracted operator of the

WRCRWA treatment plant located near the Santa Ana River, west of the city of Norco. Agencies and communities served by the plant include the city of Corona, Home Gardens Sanitary District, Jurupa Community Services District, the city of Norco, and Western Water.

The treatment plant has a total capacity of 14 MGD, and currently processes an average of 8.78 MGD from residential and commercial wastewater customers, some of which are in Western Water's retail service area. Of the total plant capacity of 14 MGD, Western Water owns treatment capacity rights of 1.93 MGD. Wastewater flows from

Western Water customers averages 0.88 MGD, or 46 percent of the treatment capacity right.

In 2018 the plant completed a \$74.3 million upgrade and expansion to 14 MGD to better serve the needs of the steady growth in the region. Since Western Water's existing owned capacity is sufficient for its current and future customers, Western Water did not participate in the plant expansion cost, but participated in related odor control costs. WRCRWA received a change of use permit from the State Water Resources Control Board (SWRCB) in February 2018, allowing WRCRWA member agencies to use some or all of its recycled water for beneficial reuse (e.g., irrigation, groundwater recharge). WRCRWA continues to pursue the highest and most efficient use of its recycled water. This includes an opportunity to connect WRCRWA to Inland Empire Utilities Agency's (IEUA) existing recycled water system. The recycled water would be delivered to direct customers for irrigation purposes and/or recharged in the Chino Groundwater Basin. While IEUA has a recycled water permit from the Santa Ana Regional Water Quality Control Board (RWQCB), WRCRWA will need to coordinate with the RWQCB with regards to any additional recycled water permits that may be required under this arrangement.

SEWER AND RECYCLED WATER SERVICES

LA SIERRA SERVICE AREA

Western Water provides wastewater collection and conveyance services to approximately 5,200 customers in the La Sierra area of the city of Riverside. The collected wastewater, averaging about 0.88 MGD, flows to the WRCRWA treatment plant with ultimate disposal of the tertiary treated wastewater into the Prado Basin. The collection system serving La Sierra is maintained by Western Water personnel who ensure pipelines and lift stations are functioning properly.

SANTA ROSA REGIONAL RESOURCES AUTHORITY

Western Water is one of the three member agencies comprising the Santa Rosa Regional Resources Authority (SRRRA), located in Murrieta. SRRRA is responsible for collecting, treating and disposing of or recycling wastewater for residents and businesses in the Murrieta, Temecula, and Wildomar communities. The joint powers authority comprises Elsinore Valley Municipal Water District, Rancho California Water District, and Western Water. Wastewater flows originating in the SRRRA service area are treated at the Santa Rosa Water Reclamation Facility. The treatment plant has a capacity of 5 MGD. On average, the plant currently treats 3.5 MGD, of which Western Water's portion was .75 MGD in fiscal year 2023.

MURRIETA SERVICE AREA

Western Water provides wastewater collection and conveyance services to approximately 2,300 customers surrounding the historic downtown area of the city of Murrieta. Treatment of roughly 750,000 gallons per day of wastewater from the Murrieta area is provided by SRRRA. Eastern Municipal Water District provides treatment services to 75 of Western Water's Murrieta commercial customers.

INLAND EMPIRE BRINE LINE

The Inland Empire Brine Line (Brine Line), is an industrial wastewater disposal system owned by the Santa Ana Watershed Project Authority (SAWPA). The Brine Line is designed to convey 30 MGD of non-reclaimable wastewater from the upper Santa Ana River basin area to the ocean for disposal after treatment by the Orange County Sanitation District. The non-reclaimable wastewater consists of desalter brine concentrate, or salt-laden waste, and industrial wastewater. The Brine Line dischargers include desalter facilities operated by the Chino Desalter Authority, city of Corona, Eastern Municipal Water District, Western Water and other commercial and industrial entities. Western Water is a member agency of SAWPA and operates a wastewater disposal station located at the city of Corona's Wastewater Treatment Plant No. 1, which has a connection to the Brine Line.

One of the rotary drum thickeners for wastewater at the Santa Rosa Regional Resources Authority (SRRRA)

ECONOMIC CONDITIONS AND OUTLOOK

As with all industries, the water industry is affected by a wide variety of economic factors, including legislative action, regulatory requirements, inflation, and labor force availability. Significant factors that particularly affect Western Water are the availability and cost of water, energy costs, and property development.

For Western Water, efficient water use by all customers is paramount. As California continues to ebb and flow between dry and wet cycles, it is Western Water's responsibility to help communicate the value of water and assist customers in using it wisely. In order to assist its customers to continue to save water, Western Water has increased indoor and outdoor rebate funding available to customers. Western Water is participating in all Department of Water Resources (DWR) and SWRCB working groups to lobby for future water use efficiency standards that are achievable by water users Statewide.

In response to legislation by State Assembly Bill (AB) 1668 and Senate Bill (SB) 606, Western Water continues to work with the DWR and the SWRCB to develop a long-term framework that will make water conservation a California way of life. This framework will help to improve the resiliency of California supplies in times of drought. Western Water is also participating in working groups hosted by DWR and SWRCB, ranging in topics from water loss reporting and data streaming to standard outdoor water use objectives.

Although Western Water has increased local water supplies over the years, it is still heavily dependent upon imported supplies from MWD for 54 percent of all water for its retail customers. MWD continues to experience increases in the cost of acquiring and delivering water to member agencies, such as Western Water. As a result, MWD's Tier 1 rate for full-service potable water will increase from \$1,209 per acre-foot to \$1,256 per acre-foot on Jan. 1, 2024, a 3.9 percent increase.

Fully treated and disinfected
"recycled water" from the
Western Water Recycling Facility

ECONOMIC CONDITIONS AND OUTLOOK

New meter connections per year have steadily increased due to development activity. Western Water continues to plan for and construct the necessary infrastructure capable of accommodating the significant long-term growth expected in the region. In addition, Western Water is aggressively pursuing alternative sources of water and expanding efficiency and education programs, as well as increasing the use of non-potable and recycled water where appropriate.

Western Water tests water more than 30,000 times per year

MAJOR INITIATIVES

At Western Water, we take pride in breaking ground and finding innovative solutions. With a highly skilled and professional team, we lead with vision, ingenuity, and tenacity to tackle challenges head-on, ensuring a sustainable future for generations.

Our commitment to collaboration extends beyond our local borders as we prioritize securing water resources and emphasize proactive planning. We adapt to changing environmental conditions, population growth, and rising costs by constantly evaluating and updating our long-term strategies. Staying ahead of the curve allows us to anticipate future water needs and implement measures that ensure water availability, quality, and sustainability.

MAKING WATER RELIABILITY A TOP STATE PRIORITY

Western Water is a leading force in a coalition of California water agencies dedicated to prioritizing long-term water supply reliability for all—communities, businesses, agriculture and the environment. The coalition has spurred efforts to address California's water supply crisis, bringing together diverse stakeholders from different geographic regions and sectors of the water community. Through collaborative efforts, the coalition effectively defined the water supply crisis as a pressing issue requiring immediate action from the State.

The impact of the coalition's work gained recognition from Governor Newsom, who cited the group's report titled "Big & Bold: Refocusing California's Water Management Strategy" as a foundational basis for the State's new Water Supply Strategy.

The coalition also successfully advocated for the California Municipal Utilities Association (CMUA) to prioritize water supply as its top policy concern resulting in a legislative proposal that would establish statewide water supply targets.

SUCCESSFUL PIPELINE REPLACEMENT PROGRAM

Western Water replaced nearly 8,000 feet of aging steel pipeline in the Riverside service area in the past year. These upgrades significantly improve system reliability for hundreds of customers, replacing the older pipelines with modern PVC pipelines, adding new control and isolation valves, and improving service connections. This effort advances Western Water's multi-year, fully financed, proactive pipeline replacement program.

Project successes include:

- Replacing 1,600 linear feet of aged steel pipeline in the Lake Hills area.
- Replacing 6,300 linear feet of aging steel pipelines in the Mission Grove area.

EFFECTIVE REGIONAL PARTNERSHIPS

Through innovative and creative partnerships, Western Water is creating a sustainable water supply for its community and actively preparing for future droughts. The completed "Connecting the Drops" project directly advanced stormwater, recycling, and groundwater quality improvement projects that bring new local groundwater to the region.

The Sterling Pump Station can pump more than 9,000 gallons of water per minute through the La Sierra Pipeline

MAJOR INITIATIVES

Western Water is also involved in the Santa Ana River Conservation and Conjunctive Use Program (SARCCUP)—a groundbreaking partnership that has constructed recharge ponds, extractions wells and conveyance facilities so that collaborative agencies can purchase surplus water imported in wet years via the State Water Project, store it across six groundwater basins within the Santa Ana Watershed and add an enhanced measure of water security for the customers we all serve.

Western Water prioritizes significant investments in infrastructure projects, such as groundwater wells, treatment, and conveyance facilities. To support these projects, Western Water has successfully pursued and received millions of dollars in grant funding for design and construction.

SECURING RECORD-BREAKING GRANT FUNDING

Western Water received eight new grants totaling \$23.4 million in 2023. Combined with its 2022 awards of \$9.4 million, the recent awards bring the total grant award to \$32.8 million – the highest in Western Water's history. These grants will help enhance the delivery of safe and reliable water to the Western Riverside County region.

The grants are allocated to fund the following projects:

- **Regional Well Installation and Water Quality Treatment Project** to increase local water supplies for the region, helping reduce reliance on imported water.
- **Landscape transformation at the March Field Air Museum** to replace 20,000 square feet of turf with native, water-efficient landscaping and irrigation.
- **Purchase and installation of a permanent backup diesel engine-driven self-primed pump and a permanent backup generator** to provide more resiliency, ensuring critical facilities remain operational during emergencies.
- **Western Water Recycling Facility (WWRF) Project** to upgrade distribution infrastructure and expand access to a reliable, sustainable water supply.
- **PFAS Treatment and Prevention Project Phase 2** to improve the quality of recycled water leaving the WWRF treatment plant.
- **Interconnection with Rancho California Water District in Murrieta and Interagency Agreement with the City of Murrieta** to complete annexation to MWD and construct new water infrastructure to support Murrieta's Innovation Zone. A reliable water supply will attract new businesses and jobs, supporting the region's economic growth and development.

UPDATED CUSTOMER EXPERIENCE

Western Water's dedication to superior customer service has been exemplified over the past year through a series of efforts, including a thoughtful branding campaign. More than a change in aesthetics, Western Water's updated brand reflects our unyielding pledge to provide high-quality, reliable water and wastewater service to the community. Positive impacts for customers included a renewed focus in the following areas:

- Enhanced communication
- Clearer service commitments to customers and the community
- Improved customer experience and satisfaction
- Increased public trust and reliability

FINANCIAL POLICIES

Western Water has formally adopted the following financial policies:

CASH RESERVE POLICY

This policy states the purpose, source, and minimum/maximum funding levels for each of its designated reserves. These reserves have been established to meet internal requirements and/or external legal requirements. This policy enables restricting funds for future infrastructure needs, replacement of aging facilities, bond reserves, and various operating reserves to mitigate unexpected occurrences. These reserves are critical to Western Water's financial strength and high credit ratings.

INTEREST AND FINANCIAL RISK MANAGEMENT POLICY

The purpose of this policy is to establish guidelines for the use and management of all interest rate and risk management agreements incurred in connection with the expected issuance of new bonds, notes, and other obligations, or to accompany bonds already issued, or to manage other risks of Western Water. This policy sets forth the manner of execution of swaps, and provides for security and payment provisions, risk considerations, and certain other relevant provisions.

DEBT AND FINANCIAL MANAGEMENT POLICY

Western Water's debt and financial management policy is designed to establish parameters for issuing debt and provide guidance to decision-makers concerning all options available to finance infrastructure and other capital projects so that the most prudent, equitable and cost-effective method of financing is selected. The policy also documents the objectives to be achieved by staff both prior and subsequent to debt issuance. It promotes objectivity in the decision-making process and facilitates the financing process by establishing important policy decisions in advance.

INVESTMENT POLICY

The investment policy establishes guidelines and practices to be used in effectively managing Western Water's available cash and investment portfolio. It applies to all cash and investment assets of Western Water except those funds maintained in deferred compensation accounts for employees, and those funds maintained for the retired employee medical benefit. All Western Water monies, including those not required for immediate expenditure, are to be invested in compliance with governing provisions of law (California Government Code Sections 53600 et seq.). The policy lists in detail authorized investments and the percentage of portfolio limitations and required credit ratings for each investment type.

ACCOUNTING SYSTEM

Western Water's Finance Department is responsible for providing financial services including accounting and reporting, budgeting, accounts payable and receivable, purchasing, and custody and investment of funds. Western Water accounts for its activities as an enterprise fund and prepares its financial statements on the accrual basis of accounting, under which revenues are recognized when earned and expenses are recorded when liabilities are incurred. It is the intent of the board of directors to manage Western Water's operations as a business, thus matching revenues against the costs of providing the services. Western Water also reports on fiduciary fund activities for the Western Municipal Water District Retirement Medical Plan, an Other Post-Employment Benefit Plan. The fiduciary fund reporting focuses on economic resources and are accounted for under the accrual basis of accounting.

FINANCIAL POLICIES

INTERNAL CONTROLS

Western Water operates within a system of internal accounting controls established and continually reviewed by management to provide reasonable assurance that assets are adequately safeguarded and transactions are recorded in accordance with Western Water policies and procedures. When establishing and reviewing controls, management must consider the cost of the control and the value of the benefit derived from its utilization. Management typically maintains or implements only those controls for which its value adequately exceeds its costs. Past audits have not noted any weaknesses in internal controls.

BUDGETARY CONTROLS

Though Western Water is not legally required to adopt and adhere to a budget or present budgetary comparison information, the board of directors has chosen to approve a two-year operating budget as a management tool. Quarterly comparison reports of budget to actual are prepared and presented at a summary level to the board of directors, along with explanations of significant variances.

The Victoria Recharge Basin will increase groundwater storage through the capture and recharge of stormwater during wet years

AWARDS AND ACKNOWLEDGMENTS

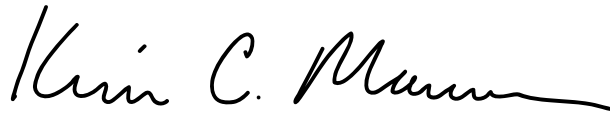

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement (COA) for Excellence in Financial Reporting to Western Water for its Annual Comprehensive Financial Report (ACFR) for the fiscal year ended June 30, 2022. This is the 18th year that Western Water has achieved this prestigious award. To be awarded a COA, a government must publish an easily readable and efficiently organized ACFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A COA is valid for a period of one year only. We believe that our current ACFR continues to meet the COA Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

We would like to express our appreciation to the Finance Department staff and the independent accounting firm of Clifton Larson Allen, LLP for the efforts made to prepare this report. We would also like to thank the board of directors for their continued interest and support in all aspects of Western Water's financial management.

Respectfully submitted,

Craig D. Miller

INDEPENDENT AUDITORS' REPORT

Board of Directors
Western Municipal Water District
Riverside, California

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the business-type activities and fiduciary activities of the Western Municipal Water District (the District), as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and the fiduciary activities of the District, as of June 30, 2023, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions. The financial statements of the fiduciary activities were not audited in accordance with *Government Auditing Standards*.

Emphasis-of-Matter - Change in Accounting Principle

As described in Note 16 to the financial statements, effective July 1, 2022, the District adopted new accounting guidance, GASB No. 96, *Subscription-based Information Technology Arrangements*. Our opinions are not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of the District's proportionate share of the plan's net pension liability and related ratios as of the measurement date, the schedule of contributions - pension, the schedule of changes in the net other postemployment benefits (OPEB) liability and related ratios, and the schedule of contributions - OPEB, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditors' report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 19, 2024, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of Western Municipal Water District of Riverside County (Western Water), we offer readers of the basic financial statements this narrative overview and analysis of the financial activities of Western Water for the year ended June 30, 2023. We encourage readers to consider the information presented here in conjunction with the preceding Independent Auditor's Report, and the accompanying notes to the basic financial statements.

Overview

Western Water

Western Water was formed in 1954 under the Municipal Water District Act of 1911 for the purpose of bringing supplemental water from the Metropolitan Water District of Southern California to a growing western Riverside County. Western Water operates under the authority of the California Water Code and engages in various activities classified as "proprietary." The primary activities of Western Water include the sale and delivery of potable and non-potable water to wholesale, domestic, agricultural and commercial accounts, as well as the collection, treatment and disposal of wastewater. Western Water also provides both operating and administrative contract services to other agencies within its 527-square-mile service area.

Required Financial Statements

The basic financial statements of Western Water report information utilizing the full accrual basis of accounting and conform to accounting principles that are generally accepted in the United States of America. The basic financial statements consist of three interrelated statements designed to provide the reader with relevant, understandable data on Western Water's financial condition and operating results. They are the Statement of Net Position, the Statement of Revenues, Expenses and Change in Net Position, and the Statement of Cash Flows.

The *Statement of Net Position* presents information on Western Water's assets, deferred outflows of resources, liabilities, and deferred inflows of resources, and provides information about the nature and amounts of investments in resources and obligations to Western Water's creditors with the remaining balance being reported as net position. Over time, increases and decreases in net position may serve as a useful indicator of whether the financial position of Western Water is improving or deteriorating. However, one must consider other non-financial factors such as changes in economic conditions, population growth, zoning, and new or changed government legislation.

The *Statement of Revenues, Expenses and Change in Net Position* identifies Western Water's revenues and expenses for the fiscal year. It provides information on operations over the past fiscal year and can be used to determine whether Western Water has recovered all of its projected costs through user fees, tax revenues and other service-related charges.

The *Statement of Cash Flows* presents information regarding Western Water's cash receipts and cash payments for the period categorized according to whether they stem from operating activities, non-capital financing activities, capital and related financing activities or investing activities. From this statement, the reader can obtain comparative information on the sources and uses of Western Water's cash.

The *Notes to the Basic Financial Statements* provide additional information that is essential to a full understanding of the data provided in the basic financial statements and are an integral part of the basic financial statements.

In addition, Western Water reports information on a Fiduciary Fund where Western Water holds the assets as a trustee for the benefit of others. The Fiduciary Fund Statements consist of the Statement of Fiduciary Net Position and Statement of Changes in Fiduciary Net Position.

The *Statement of Fiduciary Net Position* presents information on assets, liabilities, and deferred outflow and inflow of resources of fiduciary activities.

The *Statement of Changes in Fiduciary Net Position* presents additions and deductions to or from net position of the Fiduciary Fund.

Summary Financial Information and Analysis

Western Water's Statement of Net Position remains strong, providing a foundation for continued growth within Western Water's service area. Historically, Western Water experiences a loss at the operating level, meaning operating revenues are less than operating expenses. This operating loss is normally offset by net non-operating revenues. In fiscal year 2023, this loss has been offset by net non-operating revenues primarily from property tax revenues as well as other revenues. Explanations for significant changes from the prior year are provided in the discussion that follows.

Statements of Net Position

The following table compares the various categories of assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position between the current and prior fiscal year.

Condensed Statements of Net Position as of June 30, 2023 and 2022

	As of June 30,		Increase (Decrease)	
	2023	2022	\$ Change	% Change
Assets				
Current	\$ 270,647,522	\$ 248,730,576	\$ 21,916,946	8.8%

Total Assets	<u>\$ 788,317,564</u>	<u>\$ 767,238,803</u>	<u>\$ 21,078,761</u>	<u>2.7%</u>
Deferred Outflows of Resources	<u>\$ 23,799,113</u>	<u>\$ 19,560,800</u>	<u>4,238,313</u>	<u>21.7%</u>
Liabilities				
Current	\$ 50,636,745	\$ 47,870,446	\$ 2,766,299	5.8%
Noncurrent	226,898,159	217,891,491	9,006,668	4.1%
Total Liabilities	<u>\$ 277,534,904</u>	<u>\$ 265,761,937</u>	<u>\$ 11,772,967</u>	<u>4.4%</u>
Deferred Inflows of Resources	<u>\$ 13,445,100</u>	<u>\$ 23,364,666</u>	<u>\$ (9,919,566)</u>	<u>-42.5%</u>
Net Position				
Net investment in capital assets	\$ 277,868,096	\$ 274,308,171	\$ 3,559,925	1.3%
Restricted for debt service	1,510,763	1,443,855	66,908	4.6%
Restricted for capacity charges	25,492,336	24,913,314	579,022	2.3%
Restricted for other post-employment benefits (OPEB)	6,953,711	6,588,963	364,748	5.5%
Unrestricted	209,311,767	190,418,697	18,893,070	9.9%
Total Net Position	<u><u>\$ 521,136,673</u></u>	<u><u>\$ 497,673,000</u></u>	<u><u>\$ 23,463,673</u></u>	<u><u>4.7%</u></u>

Assets

At June 30, 2023, total assets increased by \$21.1 million, or 2.7% as compared to June 30, 2022. This increase is primarily due to increases in 1) receivables, net of allowance for doubtful accounts of \$9.7 million primarily from wholesale water agency customers that were collected subsequent to year-end and 2) additional capacity rights and construction-in-process capital assets not being depreciated of \$17.0 million.

Deferred Outflows of Resources

Deferred outflows of resources are consumption of net position that apply to future periods. As of June 30, 2023, total deferred outflows of resources increased by \$4.2 million, or 21.7% as compared to June 30, 2022. This is largely due to an increase in the deferred outflow of resources related to deferred pension outflow in the amount of \$6.5 million. Information on Western Water's pensions can be found in Note 10 of the Notes to the Basic Financial Statements.

Liabilities

At June 30, 2023, total liabilities increased by \$11.8 million, or 4.4% as compared to June 30, 2022. This is primarily due to increases in net pension liability in the amount of \$14.4 million. Information on Western Water's pensions can be found in Note 10 of the Notes to the Basic Financial Statements.

Deferred Inflows of Resources

Deferred inflows of resources are acquisition of net position applicable to a future reporting period. As of June 30, 2023, total deferred inflows of resources decreased by \$9.9 million, or 42.5% as compared to June 30, 2022. This is primarily due to decreases in deferred inflows of resources related to pensions in the amount of \$9.1 million. Information on Western Water's pensions can be found in Note 10 of the Notes to the Basic Financial Statements.

Net Position

Net position is the net from Western Water's assets, deferred outflows of resources, liabilities, and deferred inflows of resources. Net position increased as of June 30, 2023 by \$23.5 million, or 4.7% as compared to June 30, 2022. Net position is classified into five categories: 1) net investment in capital assets, 2) restricted for debt service, 3) restricted for capacity charges, 4) restricted for other post-employment benefits, and 5) unrestricted.

Net Investment in Capital Assets – The amount of net investment in capital assets, net of related debt, is the carrying value of capital assets less accumulated depreciation and less any liability outstanding related to the capital assets. The amount as of June 30, 2023 was \$277.9 million. The \$3.6 million, or 1.3% increase in fiscal year 2023 is detailed in the next table. Note that the amounts reported as "related debt" in the following table can either increase if debt proceeds are applied to fund capital assets, or decrease due to required annual debt service payments.

Net Investment in Capital Assets as of June 30, 2023 and 2022

	As of June 30,		Increase (Decrease)	
	2023	2022*	\$ Change	% Change
Plant, building and improvements	\$ 477,389,556	\$ 471,302,851	\$ 6,086,705	1.3%
Capacity rights	136,306,046	127,640,542	8,665,504	6.8%
Construction in progress	34,090,787	24,045,886	10,044,901	41.8%

Acquisition and construction of capital				
assets in accounts payable	2,629,243	4,021,026	(1,391,783)	-34.6%
Net investment in capital assets	\$ 277,868,096	\$ 274,308,171	\$ 3,559,925	1.3%

*As restated for the adoption of GASB 96. See Note 14 for further information.

Restricted for Capacity Charges – The \$25.5 million restricted for capacity charges at June 30, 2023 reflects added facilities charges and distribution system fees received from land owners and developers for the future expansion of water distribution and wastewater treatment and conveyance systems. An equivalent amount is reported in the Assets section of the Statement of Net Position as part of the restricted investments line item (classified as capacity charges in Note 3 of the Notes to the Basic Financial Statements). Net position becomes restricted when constraints placed on use are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments, or imposed by law through constitutional provisions or enabling legislation. Additional information related to restricted cash and investments can be found in Note 3 of the Notes to the Basic Financial Statements.

Restricted for other post-employment benefits (OPEB) – The \$7.0 million restricted for OPEB at June 30, 2023 consists of net assets recognized for OPEB.

Unrestricted – The unrestricted amount is the portion of net position that is not already classified in the above categories. The total amount of unrestricted net position at June 30, 2023 was \$209.3 million. Although these funds are not restricted, the Board of Directors of Western Water has designated these funds for various construction projects, system improvements and operations.

Changes in Net Position

The following table compares the various categories of revenues, expenses and changes in net position between the current and prior fiscal year:

Condensed Statements of Revenues, Expenses and Changes in Net Position for the Fiscal Years Ended June 30, 2023 and 2022

	Fiscal Years Ended June 30,		Increase (Decrease)	
	2023	2022	\$ Change	% Change
Operating Revenue	\$ 125,213,685	\$ 135,837,820	\$ (10,624,135)	-7.8%
Operating Expenses	(141,241,014)	(148,730,180)	7,489,166	-5.0%
Net Non-operating Revenue	30,142,813	11,535,417	18,607,396	161.3%
Net Income (Loss) Before Capital Contributions	14,115,484	(1,356,943)	15,472,427	-1104.2%
Capital Contributions	9,348,189	11,818,602	(2,470,413)	-20.9%
Change in Net Position	23,463,673	10,461,659	13,002,014	124.3%
Net Position, July 1	497,673,000	487,211,341	10,461,659	2.1%
Net Position, June 30	<u>\$ 521,136,673</u>	<u>\$ 497,673,000</u>	<u>\$ 23,463,673</u>	4.7%

Combined Revenue

The following table presents a comparison of revenues by category for the fiscal years ended June 30, 2023 and 2022:

Revenues by Category for the Fiscal Years Ended June 30, 2023 and 2022

	Fiscal Years Ended June 30,		Increase (Decrease)	
	2023	2022	\$ Change	% Change
Water sales	\$ 79,412,015	\$ 90,804,160	\$ (11,392,145)	-12.5%
Water service	23,920,251	24,263,833	(343,582)	-1.4%
Wastewater disposal	15,710,393	15,243,153	467,240	3.1%
Contractual services	6,044,627	5,376,463	668,164	12.4%
Property taxes	32,871,464	28,939,433	3,932,031	13.6%
Investment earnings	911,945	(14,568,475)	15,480,420	-106.3%
Capacity rights sales	222,552	209,018	13,534	6.5%
Other	2,748,777	3,481,682	(732,905)	-21.1%
Total revenues	161,842,024	153,749,267	8,092,757	5.3%
Capital contributions	9,348,189	11,818,602	(2,470,413)	-20.9%
Total revenues and capital contributions	<u>\$ 171,190,213</u>	<u>\$ 165,567,869</u>	<u>\$ 5,622,344</u>	3.4%

Combined revenue (excluding capital contributions) for fiscal year 2023 totaled \$161.8 million, an increase of \$8.1 million, or 5.3% from fiscal year 2022. The most significant variances from fiscal year 2022 to 2023 were in three revenue categories: water sales (\$11.4 million decrease), property taxes (\$3.9 million increase) and investment earnings (\$15.5 million increase).

Water Sales - The \$11.4 million decrease in water sales was a result of a decrease in demand in Western Water's retail and wholesale service area due to higher than average rainfall in the State of California during the fiscal year.

Property Taxes - The \$3.9 million increase was attributable to the higher receipts from countywide assessed valuations with the dissipating effects of the pandemic contributing to the recovering economy.

Investment Earnings - The \$15.5 million increase in investment earnings was primarily due to a reduction in prior year's unrealized losses from fair market value adjustments of Western Water's investments.

Capital Contributions

During fiscal year 2023, Western Water experienced a decrease of \$2.5 million, or 20.9% from fiscal year 2022, in capital contributions. Capital contributions include water and sewer added facilities charges (capacity charges), contributed assets from developers and grant proceeds. The decrease in capital contributions is mainly due to lower capacity charge revenues compared to the prior year.

Combined Expenses

The following table presents a comparison of expenses by category for the fiscal year ended June 30, 2023 and 2022:

Expenses by Category for the Fiscal Years Ended June 30, 2023 and 2022

Expense Category	Fiscal Years Ended June 30,		Increase (Decrease)	
	2023	2022	\$ Change	% Change
Source of supply	\$ 1,512,718	\$ 1,401,007	\$ 111,711	8.0%
Purchased water	66,588,834	78,965,903	(12,377,069)	-15.7%
Pumping - booster pumps	6,733,795	6,301,412	432,383	6.9%
Water treatment	5,344,748	5,027,518	317,230	6.3%
Transmission and distribution	12,065,586	11,392,793	672,793	5.9%
Administrative and general	13,133,141	11,992,745	1,140,396	9.5%
Contractual services	4,947,799	4,331,625	616,174	14.2%
Wastewater disposal	12,021,543	12,044,690	(23,147)	-0.2%
Depreciation and amortization	16,039,268	14,369,632	1,669,636	11.6%
Interest expense	4,916,254	5,202,386	(286,132)	-5.5%
Other	4,422,854	4,076,499	346,355	8.5%
Total expenses	<u>\$ 147,726,540</u>	<u>\$ 155,106,210</u>	<u>\$ (7,379,670)</u>	-4.8%

Combined expenses for fiscal year 2023 totaled \$147.7 million, a decrease of \$7.4 million, or 4.8% from fiscal year 2022, which is primarily due to a reduction in purchased water, in the amount of \$12.4 million due to higher than average rainfall in the State of California during the fiscal year.

Purchased Water – The \$12.4 million decrease in purchased water expense was mainly due to the decrease in volume of imported water during fiscal year 2023 from MWD due to decreased demand from both retail and wholesale water agency customers.

Capital Assets

Western Water's investment in capital assets as of June 30, 2023 was \$280.0 million (net of accumulated depreciation). This includes investment in buildings, building improvements, capacity rights, land, land improvements, equipment, vehicles, and plant assets such as supply sources, pumping stations, water treatment plant, transmission and distribution pipelines, wastewater plant, etc. Additional information can be found in Note 6 of the Notes to the Basic Financial Statements.

The following table summarizes Western Water's capital assets, net of accumulated depreciation, at June 30:

	2023	2022
Plant, buildings and improvements	\$ 477,389,556	\$ 471,302,851
Capacity rights	136,306,046	127,640,542
Construction and right of use subscription-in-progress	34,090,787	24,045,886
Land and land improvements	17,668,663	17,668,663
Equipment and vehicles	18,812,494	18,892,181
Right of use leased and subscription-based assets	2,160,367	1,232,703
Total capital assets	686,427,913	660,782,826
Less accumulated depreciation	(227,957,510)	(212,437,921)
Total capital assets, net of accumulated depreciation	<u>\$ 458,470,403</u>	<u>\$ 448,344,905</u>

Long-term Liabilities

As of June 30, 2023, Western Water has outstanding long-term liabilities of \$226.9 million. Long-term liabilities include a swap liability, compensated absences, amounts due to other governments, bonds, leases, notes payable, net pension and OPEB liabilities. Additional information regarding long-term debt can be found in Note 7 of the Notes to the Basic Financial Statements, information regarding the swap liability can be found in Note 8, and information regarding the net pension liability can be found in Note 10.

Western Water's outstanding long-term liabilities as of June 30 are as follows:

	2023	2022
Compensated absences	\$ 4,840,855	\$ 4,654,530
Lease and subscription-based payable	1,792,267	1,034,873
Due to other governments	46,243,113	46,391,279
Bonds payable		
Revenue bonds	123,555,000	125,675,000
Unamortized premium	25,789,095	27,698,311
Swap liability	2,095,969	2,500,528
Note payable	5,086,978	5,519,702
Net pension liability	26,040,982	11,547,259
Total long-term liabilities	235,444,259	225,021,482
Less current portion	(8,546,100)	(7,129,991)
Total long-term liabilities, net of current portion	<u>\$ 226,898,159</u>	<u>\$ 217,891,491</u>

Economic Factors and Next Year's Budgets and Rates

Anticipated growth will further create demand for water supply, wastewater treatment and disposal, and additional capital facilities. These demands have been anticipated in Western Water's facility master plans with new supply demands being met through imported water, interties with neighboring agencies, desalted water, maximizing reclaimed water and conservation. Western Water's 2024 fiscal year budget includes \$5.8 million in capital projects, net of estimated grant funding and financing proceeds.

Rates effective July 1, 2023 as recommended by a cost-of-service study, were adopted by the Board of Directors on June 2, 2021. This resulted in an increase for fiscal year 2024 of 4.1% to an average bill for a residential customer in the Riverside service area, 4.2% to customers in the Murrieta service area, and 4.5% to customers in the Rainbow service area. A rate increase of 3.0% for most of Western Water's wastewater customers went into effect on July 1, 2023, to accommodate rising costs to operate and maintain the wastewater system.

Contacting Western Water's Financial Management

This financial report is designed to provide a general overview of the Western Municipal Water District of Riverside County's finances for the Board of Directors, customers, taxpayers, creditors and other interested parties. Questions concerning any of the information provided in the report or requests for additional information should be addressed to Western Water's Finance Department, 14205 Meridian Parkway, Riverside, CA 92518.

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(1) Reporting Entity and Summary of Significant Accounting Policies

A. Organization and Operations of the Reporting Entity

Western Municipal Water District of Riverside County (Western Water) was formed in 1954 and created for the purpose of importing and delivering water to wholesale and retail customers within its service area. Western Water is governed by a five-member Board of Directors (the Board) who serve overlapping four-year terms. Western Water purchases approximately 78% of its water from the Metropolitan Water District of Southern California (MWD). Approximately 38% of the purchased water from MWD comes from the Colorado River aqueduct and approximately 62% comes from the State Water Project.

The criteria used in determining the scope of the financial reporting entity is based on Codification of Governmental Accounting and Financial Reporting Standards, Part II. Financial Reporting, Section 2100: *Defining the Financial Reporting Entity*. Western Water is the primary governmental unit based on the foundation of a separately elected governing board that is elected by the citizens in a general popular election. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. Western Water is financially accountable if it appoints a voting majority of the organization's governing body and: 1) It is able to impose its will on that organization, or 2) There is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government.

The Western Municipal Water District Facilities Authority (the Authority) was created in October 2002 by a joint exercise of powers agreement for the purpose of financing public capital improvements. It is governed by a Board of Directors comprising Western Water's Board of Directors. The Authority has issued debt that is secured solely from installment payments payable under an installment purchase agreement entered into between Western Water and the Authority. All accounts or funds created and established pursuant to any instrument or agreement to which the Authority is a party, and any interest earned or accrued thereon, shall inure to the benefit of Western Water. Separate financial statements are not prepared for the Authority. It is reported as a blended component unit.

Fiduciary Component Unit

The Western Municipal Water District Retirement Medical Benefits Plan (the Medical Plan), an Other Post-Employment Benefit Plan, provides advance funding for post-employment healthcare benefits to eligible employees and eligible dependents in accordance with plan provisions. Separate financial statements are prepared for the Voluntary Employee's Beneficiary Association (VEBA) Trust, established by Western Water for the Medical Plan, and may be obtained at Western Municipal Water District, 14205 Meridian Parkway, Riverside, CA 92518.

B. Basis of Accounting and Measurement Focus

Western Water reports its activities as a special-purpose government engaged in business-type activities using the economic resources measurement focus, which is used to account for operations that are financed and operated in a manner similar to a private business enterprise, where, in most instances, the intent of Western Water is that the costs of providing water or wastewater disposal to its service area on a continuing basis be financed or recovered primarily through user charges (water sales, water service charges and wastewater disposal), capital grants and similar funding.

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

B. Basis of Accounting and Measurement Focus, continued

Revenues and expenses are recognized on the full accrual basis of accounting.

Revenues are recognized in the accounting period in which they are earned and expenses are recognized in the period incurred, regardless of when the related cash flows take place.

Operating revenues and expenses, such as water sales, water purchases and wastewater disposal, result from exchange transactions associated with the principal activity of Western Water. Exchange transactions are those in which each party receives and gives up essentially equal values. Management, administration and depreciation expenses are also considered operating expenses. Other revenues and expenses not included in the above categories are reported as non-operating revenues and expenses.

Western Water also reports on fiduciary fund activities. The Other Post-Employment Benefit Trust Fund is used to account for contribution and distributions related to the Medical Plan.

C. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflow of Resources, and Net Position

1. Investments

Investments are generally reported in the accompanying statement of net position at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Changes in fair value that occur during a fiscal year are recognized as investment income reported for that fiscal year. In addition to the change in fair value, other investment income includes interest earnings and any gains or losses realized upon liquidation or sale of investments.

2. Receivables, Net Allowance for Uncollectible Accounts

Western Water extends credit to customers in the normal course of operations. Account write-offs are based on management's evaluation of customer accounts and creditor's ability to pay. The allowance for doubtful accounts is deducted against receivables on the statement of net position.

3. Property Taxes and Assessments

The County of Riverside Assessor's Office assesses all real and personal property within Riverside County (the County) each year. The County of Riverside Tax Collector's Office bills and collects Western Water's share of property taxes and assessments. The County of Riverside Treasurer's Office remits current and delinquent property tax collections to Western Water throughout the year. Property tax revenue is recognized in the period levied for, less an allowance estimated for uncollectibles. Property tax in California is levied in accordance with Article XIII A of the State Constitution at one percent (1%) of countywide-assessed valuations. Property taxes receivable at year-end are related to property taxes collected by the County, which have not been credited to Western Water's cash balance as of June 30. The property tax calendar is as follows:

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

C. Assets, Deferred Outflow of Resources, Liabilities, Deferred Inflow of Resources, and Net Position, continued

Lien Date	January 1
Levy Date	July 1 to June 30
Due Date	November 1 - First Installment February 1 - Second Installment
Delinquent Date	December 10 - First Installment April 10 - Second Installment

4. Hedge Accounting

Western Water applies the provisions of Governmental Accounting Standards Board (GASB) Statement No. 53, *Accounting and Financial Reporting for Derivative Financial Instruments*, as amended by GASB Statement No. 64, *Derivative Instruments: Application of Hedge Accounting Termination Provisions*.

Western Water has determined that its interest rate swap agreement for reducing interest rate risk exposure on its variable-rate debt is a hedging derivative instrument. Under hedge accounting, the fair values of a hedging derivative instrument are reported as either an asset and deferred swap inflow or deferred swap outflow and a liability in a government's statement of net position.

5. Inventory

Inventory consists primarily of materials and supplies used in the construction and maintenance of Western Water's ongoing operations and are valued at weighted-average cost.

6. Restricted Assets

Restricted cash and investments are classified as restricted assets on the Statement of Net Position because these are maintained in separate bank accounts or tracked separately. Uses of these assets are restricted by applicable bond covenants, resolution, or contracts, such as with escrow agreements.

7. Capital Assets

Capital assets acquired and/or constructed are capitalized at historical cost. Western Water policy has set the capitalization threshold for reporting capital assets at \$10,000 and an estimated useful life of more than two years. Donated assets are recorded at acquisition value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the life of the asset are not capitalized. Upon retirement or other disposition of capital assets, the cost and related accumulated depreciation are removed from the respective balances and any gains or losses are recognized.

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

C. Assets, Deferred Outflow of Resources, Liabilities, Deferred Inflow of Resources, and Net Position, continued

7. Capital Assets, continued

Depreciation is recorded on a straight-line basis over the estimated useful lives of the assets, as follows:

Vehicles and Equipment	5 - 10 years
Right of use leased assets	5 - 10 years
Plant	20 - 75 years
Buildings	30 years

Western Water participates with various agencies entitling it to certain capacity rights. Such capacity rights are recorded as intangible assets and treated in accordance with GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*. Western Water's participation in these agencies is through cash payments. Monies used for the construction or expansion of capital assets, such as pipelines, wastewater facilities, etc., are recorded as capacity rights and included in capital assets. The capacity rights have either an indefinite useful life or a definite useful life depending on any legal, contractual, regulatory, technological or other factors that limit the useful life of the asset. Capacity rights with definite useful lives are amortized over the life of the agreements.

A capital asset is considered impaired if both the decline in service utility of the capital asset is large in magnitude and the event or change in circumstances is outside the normal life cycle of the capital asset. Western Water periodically evaluates prominent events or changes in circumstances affecting capital assets to determine whether impairment of a capital asset has occurred. Management has determined that there were no such impairments at June 30, 2023.

Lease and subscription right to use IT assets are defined as assets with an initial, individual cost of more than \$78,400 and an estimated useful life of at least one year.

The intangible right to use lease assets are initially measured at an amount equal to the initial measurement of the related lease liability plus any lease payments made prior to the lease term, less lease incentives, and plus ancillary charges necessary to place the lease asset into place. The right to use lease assets are amortized on a straight-line basis over the life of the related lease.

The right to use subscription IT assets are recognized at the subscription commencement date and represent Western Water's right to use the underlying IT asset for the subscription term. The right to use subscription IT assets are measured at the initial value of the subscription liability plus any payments made to the vendor at the commencement of the subscription term, less any subscription incentives received from the vendor at or before the commencement of the subscription term, plus any capitalizable initial implementation costs necessary to place the subscription IT asset into service. The right to use subscription IT assets are amortized over the shorter of the subscription term or useful life of the underlying asset using the straight-line method. The amortization period varies based on the individual subscription IT arrangements.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

C. Assets, Deferred Outflow of Resources, Liabilities, Deferred Inflow of Resources, and Net Position, continued

8. Compensated Absences

Western Water's policy is to permit employees to accumulate earned vacation leave up to a maximum of 480 hours and at a rate of 10 to 20 days per year based on the number of years of employment. Sick leave accrues at a rate of eight hours per month up to a maximum of 1,600 hours. Compensated absences are accrued when earned and most are expected to be paid at 100% of the employee's current hourly pay.

9. Deferred Outflow of Resources and Deferred Inflow of Resources

Western Water applies the provisions of GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources and Net Position*. The statement requires that the difference between assets, deferred outflow of resources, liabilities, and deferred inflow of resources be reported as net position. The impact of deferred outflow of resources and deferred inflow of resources on net position are explained in the following paragraphs.

At June 30, 2023, Western Water has three items reported as deferred outflow of resources. The first item relates to the deferred outflow of resources on debt refunding of \$7,896,019 at June 30, 2023. This amount relates to previous debt refundings in 2012 and 2020. It represents the difference in the carrying value of refunded debts and their reacquisition prices, net of amortization. The deferred outflow of resources on refunding are amortized as a component of interest expense over the life of the old debt or the new debt, whichever is shorter. The second and third items are the deferred outflow of resources related to pension and OPEB in the amount of \$12,002,165 and \$3,900,929, respectively. These amounts include the pension contributions made after the measurement date of the net pension liability, differences between expected and actual experience for both pension and OPEB, changes in assumption for pension and OPEB, net difference between projected and actual earnings on pension and OPEB plan investments, and adjustment due to differences in proportions for pension. Refer to Notes 10D and 11D for additional information.

At June 30, 2023, Western Water has four items reported as deferred inflow of resources. The first item relates to the deferred swap inflow of \$2,783,089. This amount would be recognized as an investment gain upon the early termination of the swap as it represents the fair market value or marked-to-market value of the swap at June 30, 2023. Western Water currently has no intention of terminating its interest rate swap agreement in advance. The second and third items relate to pension and OPEB in the amount of \$1,088,736 and \$8,906,646, respectively. The amounts include the deferred inflow resulting from differences between expected and actual experience for pension and OPEB, changes of assumption for OPEB, and differences between the employer's contributions and the employer's proportionate share of contributions for pension. Refer to Notes 10D and 11D for additional information. The fourth item relates to lease receivables in the amount of \$666,629. This amount is measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date. The deferred inflows of resources is recognized as revenue over the life of the lease term.

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

C. Assets, Deferred Outflow of Resources, Liabilities, Deferred Inflow of Resources, and Net Position, continued

10. Net Position

The financial statements utilize a net position presentation. Net position is categorized as follows:

- **Net investment in capital assets** – This component of net position consists of capital assets, net of accumulated depreciation and reduced by any outstanding liability associated with the acquisition, construction or improvement of those assets.
- **Restricted for debt service** – This component of net position is restricted for debt service related to the La Sierra Project State Revolving fund loan.
- **Restricted for capacity charges** – Restricted net position has constraints placed on it imposed by creditors, grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.
- **Restricted for other post-employment benefits (OPEB)** – This component of net position consists of net assets recognized for the OPEB.
- **Unrestricted** – This component of net position consists of net position that do not meet the definition of *restricted* or *net investment in capital assets*.

When both restricted and unrestricted resources are available for use, it is Western Water's policy to use restricted resources first and then unrestricted resources, as needed.

D. Revenues

1. Water and Wastewater Services

Water and wastewater revenue is based on usage and recognized at the time of use. Customers are billed on a monthly cyclical basis. Estimated unbilled water and wastewater revenue based on estimated usage through June 30 has been recognized at year-end.

2. Capital Contributions

Capital contributions represent cash and capital asset additions contributed to Western Water by property owners, granting agencies or real estate developers desiring services that require capital expenditures or capacity commitment. Capital contributions are recognized on the statement of revenues, expenses and change in net position when the cash or capital assets are received.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Revenues, continued

3. Grants

When a grant agreement is approved and eligibility requirements are met, the amount is recorded as a receivable on the statement of net position and as capital grant contribution or non-operating grant revenue, as appropriate, on the statement of revenues, expenses and change in net position.

E. Pensions

For purposes of measuring the net pension liability (asset) and deferred outflows/inflows of resources related to pensions, and pension expense (income), information about the fiduciary net position of Western Water's California Public Employees' Retirement System (CalPERS) cost-sharing plan (Plan) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

F. Other Post-Employment Benefits (OPEB)

For purposes of measuring the net OPEB liability (asset) and deferred outflows/inflows of resources related to OPEB, and OPEB expense (income), information about the fiduciary net position of Western Water's OPEB Plan and additions to/deductions from the OPEB Plan's fiduciary net position have been determined on the same basis as they are reported by the OPEB Plan. For this purpose, Western Water's OPEB Plan recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value.

G. Use of Estimates

The preparation of the basic financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, deferred outflow of resources, liabilities, deferred inflow of resources and disclosures of contingent assets and liabilities at the date of the financial statements and the reported changes in net position during the reporting period. Actual results could differ from those estimates.

H. Budgetary Policies

Western Water adopts a biennial non-appropriated budget for planning, control and evaluation purposes. Budgetary control and evaluation are affected by comparisons of actual revenues and expenses with planned revenues and expenses for the period.

(2) Cash and Investments

Cash and investments as of June 30, 2023 are classified in the financial statements as follows:

Cash	\$ 18,246,886
Restricted Cash	11,350,190
Total cash	<u>29,597,076</u>
Investments	205,125,508
Restricted investments	42,772,374
Total investments	<u>247,897,882</u>
Total cash and investments	<u><u>\$ 277,494,958</u></u>

Cash and investments as of June 30, 2023 consist of the following:

Petty cash	\$ 16,500
Deposits with financial institution	18,230,386
Deposits with escrow agents	721,550
Deposits held by fiscal agent	10,628,640
Total cash	<u>\$ 29,597,076</u>
Money Market Mutual Funds	\$ 769,148
California Local Agency Investment Fund	3,566,037
U.S. Treasury Notes	81,609,000
Government-Sponsored Agency Securities	48,917,917
Corporate Medium-Term Notes	58,389,200
Asset-Backed Securities	16,363,919
Collateralized Mortgage Obligations	30,077,413
Supranationals	7,315,131
Held by Fiscal Agent - Money Market Mutual Funds	890,117
Total investments	<u>247,897,882</u>
Total cash and investments	<u><u>\$ 277,494,958</u></u>

Investments Authorized by the California Government Code and Western Water's Investment Policy

The following table identifies the investment types that are authorized by Western Water in accordance with the California Government Code (or Western Water's investment policy, where more restrictive). The table also identifies certain provisions of the California Government Code (or Western Water's investment policy, where more restrictive) that address interest rate risk and concentration of credit risk.

Custodial Credit Risk

Custodial credit risk for *deposits* is the risk that in the event of the failure of a depository financial institution a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The California Government Code and Western Water's investment policy do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments, other than the following provision for deposits: The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. California law also allows financial institutions to secure District deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits. With respect to investments, custodial credit risk generally applies only to direct investments in marketable securities. Custodial credit risk does not apply to a local government's indirect investment in securities through the use of mutual funds or government investment pools (such as Local Agency Investment Fund (LAIF)). All investments, other than LAIF, are in the name of Western Water and held by a third-party custodian.

At June 30, 2023, the carrying amount of Western Water's deposits was \$29,580,576, and the corresponding bank balance was \$30,820,042. The difference of \$1,239,466 was principally due to outstanding checks, wires and/or deposits in transit.

Of the bank balances, up to \$250,000 is federally insured under the Federal Deposit Insurance Corporation per financial institution with balances in excess of \$250,000 collateralized in accordance with the California Government Code; however, the collateralized securities are not held in the name of Western Water.

	Bank Balance	FDIC Insurance
Deposits with financial institution	\$ 19,469,852	\$ 250,000
Deposits with escrow agents	721,550	250,000
Deposits held by fiscal agent	10,628,640	250,000
Total bank balance	\$ 30,820,042	\$ 750,000

(2) Cash and Investments, continued

Investment in State Investment Pool

Western Water is a voluntary participant in LAIF that is regulated by the California Government Code Section 16429 under the oversight of the Treasurer of the State of California. The fair value of Western Water's investment in this pool is reported in the accompanying financial statements at amounts based upon Western Water's pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis. LAIF is part of the California Pooled Money Investment Account (PMIA); included in LAIF's investment portfolio are mortgage-backed and other asset-backed securities, loans to certain state funds, securities with interest rates that vary according to changes in rates greater than a on-for-one basis, and structured notes. The amounts invested in LAIF are recorded as cash and investments. As of June 30, 2023, Western Water's total investment in LAIF was \$3,566,037.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. Western Water's investment policy provides limits on investment maturities as a means of managing exposure to fair value losses arising from increasing interest rates.

Maturities of investments at June 30, 2023 are as follows:

Investment Type	Fair Value	Investment Maturities (in Years)		
		Less Than 1	1 - 5	6 - 10
U.S. Treasury Notes	\$ 81,609,000	\$ 22,123,555	\$ 33,152,090	\$ 26,333,355

Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization.

Credit ratings of investments as of June 30, 2023 were as follows:

Investment Type	Fair Value	Minimum Policy Rating	Exempt From Disclosure	Ratings as of Year-End			Not Rated
				AAA	AA	A	
U.S. Treasury Notes	\$ 81,609,000	N/A	\$ 81,609,000	\$ -	\$ -	\$ -	\$ -

* Highest rating by at least two nationally recognized statistical rating agencies.

** Rated A or higher by at least one nationally recognized statistical rating agencies. There were two securities that had a split-rating of A/BBB+/A at June 30, 2023.

Concentration of Credit Risk

Western Water's investment policy contains no limitations on the amounts that can be invested in any one governmental agency or non-governmental issuer, other than the \$75 million limitation on LAIF, as stipulated by the California Government Code. Western Water's investment with LAIF is 1.45% of Western Water's total depository and investment portfolio as of June 30, 2023. Investments (excluding Held by Fiscal Agent) in any one issuer other than U.S. Treasury securities, mutual funds, external investment pools that represent 5% or more of total Western Water investments are as follows:

Issuer	Investment Type	Reported Amount	% of Total Investments
Federal Home Loan Bank	Government-Sponsored Agency Securities	\$ 16,894,282	7%
Federal National Mortgage Association	Government-Sponsored Agency Securities	17,424,787	7%
Federal Home Loan Mortgage Corporation	Collateralized Mortgage Obligations	30,077,413	12%

Fair Value Measurements

Western Water categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of investments. Level 1 inputs are quoted prices in active markets for identical assets. Level 2 inputs are significant observable inputs. When quoted prices in active markets are not readily available, fair values are based on pricing models or matrices maximizing the use of observable inputs for similar securities as received by Western Water's investment advisor from a third party service provider. For Western Water's derivative instrument - interest rate swap, it is valued based on applying a standard interest rate swap valuation methodology and by taking into account certain observable interest curves. Level 3 inputs are significant unobservable inputs.

Western Municipal Water District
Notes to the Basic Financial Statements

Bonds			
Domestic	No limit	75%	No limit
International	No limit	35%	No limit
Cash/Money market funds	N/A	10%	No limit

Custodial Credit Risk

The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The OPEB Trust Fund's investment policy does not contain legal or policy requirements, custodial credit risk generally applies only to direct investments in marketable securities. Custodial credit risk does not apply to a local government's indirect investment in securities through the use of mutual funds or Exchange-Traded Funds. All investments are in the name of the Trust and held by a third-party custodian.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to change in market interest rates. Interest rate risk applies to investments in debt securities.

Santa Rosa Regional Resources Authority (SRRRA)

SRRRA 2017 Bonds

On August 1, 2017, Western Water entered into a Capacity Funding Agreement with SRRRA in connection with the issuance of the 2017A and 2017B revenue bonds by SRRRA (collectively referred herein as SRRRA Bonds) to finance the acquisition of the Santa Rosa Water Reclamation Facility (SRWRF) and plant upgrades. Series 2017A tax-exempt, fixed-rate revenue bonds were issued in the amount of \$24,040,000 with interest ranging from 3.00% to 5.00% maturing on August 1, 2034. Series 2017B taxable fixed-rate revenue bonds were issued in the amount of \$31,190,000 with interest ranging from 1.5% to 3.65% maturing on August 1, 2031. Under the Capacity Funding Agreement, Western Water's shares of the 2017A and 2017B revenue bonds are \$4,156,438 and \$5,752,289, as revised respectively, which are approximately 18% of the total SRRRA Bonds based on Western Water's ownership of the treatment capacity in the SRWRF. As of June 30, 2023, Western Water's share is \$6,514,094.

As of June 30, 2023, the future annual maturities of Western Water's obligation are as follows:

Fiscal Years	Principal	Interest	Total
2024	\$ 504,409	\$ 228,685	\$ 733,094

SRRRA SRF Loan

On January 2, 2018, Western Water entered into a Funding Agreement with SRRRA for the SRRRA State Revolving Fund Loan with the State Water Resources Control Board in order to finance the costs of rehabilitation projects with respect to the SRWRF. Western Water's revised share of debt service is \$6,033,974, which is approximately 20% of the SRRRA SRF loan based on Western Water's ownership of the treatment capacity in the SRWRF, with interest at 1.8% maturing on September 30, 2051. As of June 30, 2023, Western Water's share is \$5,878,959.

State Water Resources Control Board – La Sierra Project

On April 17, 2015, Western Water entered into an agreement with the State Water Resources Control Board (SWRCB) for a Clean Water State Revolving Fund Loan to finance the construction of the La Sierra Project. The maximum loan amount was \$24,000,000 with interest at 1.5%. On March 12, 2019, the SWRCB increased the original loan approval to \$35,794,100 with interest at 1.5%, which added funding for the construction of the Sterling Reservoir and Pump Station. Western Water's annual repayment every July 1st, including principal and interest, is \$1,510,763. The repayment term is 30 years, maturing on July 1, 2050. Total proceeds from the loan were \$35,794,100. Western Water's loan amount is \$33,338,936 as of June 30, 2023.

The loan with the State Water Resources Control Board contains covenants and restrictions that include, but are not limited to, assurances relating to adherence to the Clean Water Act, Equal Opportunity and Civil rights laws, and certain other assurances.

Bonds Payable

As provided in the Bond Master Installment Purchase Agreement, Western Water has created a Rate Stabilization Fund into which Western Water deposited \$20,000,000 in May 2009. The balance in the Rate Stabilization Fund is currently \$20,000,000, which is recorded as Investments in the basic financial statements, with no usage of such funding during fiscal year 2023.

In June 2012, the Authority issued \$43,775,000 of 2012 Series A Adjustable Rate Water Revenue Refunding Bonds (2012 Series A) to refund Western Water's 2009 Series A Adjustable Rate Water Revenue Refunding Bonds (2009 Series A). The refunded bonds were fully redeemed.

2012 Series A Bonds

The 2012 Series A Bonds are adjustable interest rate bonds with varying optional redemption provisions whose rates adjust from the remarketing of bonds tendered for redemption. An underlying credit facility that expires in September 2027 provides liquidity and security for redemption should remarketing efforts not provide sufficient funds. In addition to optional redemption, mandatory redemption occurs through scheduled sinking fund payments. The bonds are secured by a pledge of Western Water's net revenues. Western Water is required to maintain net revenues equal to at least 110% of adjusted annual debt service. Refer to Note 8 for information on the interest-rate swap agreement associated with these bonds.

Scheduled principal maturities of \$25,935,000 occurring between fiscal year 2028-2043, along with any accrued interest would be due in fiscal year 2028 should the underlying credit facility, which matures in September 2027, not be renewed and the remarketing agent is unable to resell bonds that are tendered for redemption.

2020 Series A Bonds

In July 2020, the Authority issued \$90,260,000 of the 2020 Series A Water Revenue Bonds with original issue premium of \$31,341,035. The bonds were issued to: 1) refund the 2010 Series B Water Revenue, Taxable Build America Bonds (2010 Series B) in the amount of \$42,755,000, 2) refund the 2016 Series A Adjustable Rate Water Revenue Refunding Bonds (2016 Series A) in the amount of \$51,975,000 prior to the October 1, 2020 mandatory tender date, and 3) provide funds to acquire various capital improvements to Western Water's water and wastewater system facilities in the amount of \$25,500,000.

The 2020 Series A bonds bear stated interest at 5.0% and are payable semiannually on April 1st and October 1st through October 2050.

The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$5,706,939. The difference is reported on the accompanying financial statements as a deferred outflow of resources, which will be amortized through 2050. The balance of the deferred outflow is \$4,695,977 at June 30, 2023.

Total non-current	<u>\$ 89,330,000</u>		

Note Payable – Headquarters Building

In July 2016, Western Water refinanced the original unsecured financing done in September 2009 for the acquisition and development of its headquarters building. Along with this refinance, Western Water borrowed another \$8 million to accommodate the cash needs for certain capital projects. Terms of the note provide that Western Water is to make semiannual payments of \$700,546 every April 1st and October 1st, including interest, through April 2026. The note has a stated interest rate of 2.27%. As of June 30, 2023, the future annual maturities of Western Water's obligation are as follows:

Fiscal Years	Principal	Interest	Total
2024	\$ 1,316,786	\$ 84,305	\$ 1,401,091
2025	1,346,847	54,245	1,401,092
2026	1,377,593	23,498	1,401,091
Total	4,041,226	\$ 162,048	\$ 4,203,274
Less current portion	(1,316,786)		
Total non-current	<u>\$ 2,724,440</u>		

Western Municipal Water District

June 30, 2023

(7) Long-term Debt, continued

Note Payable - Vehicle

In August 2016, Western Water financed the purchase of certain vehicles for use in operations. As of June 30, 2023, the future minimum payments are as follows:

Fiscal Years	Principal	Interest	Total
2024	\$ 45,752	\$ 359	\$ 46,111
Total	45,752	359	46,111
Less current portion	(45,752)		
Total non-current	\$ -		

Note Payable - 2022A Revolving Line of Credit

On August 17, 2022, the Board of Directors of both Western Water and its Facilities Authority adopted Resolution No. 3244 and No. 23, respectively, to issue a four-year Tax-Exempt Rate Revolving Notes, Series of 2022A (revolving line of credit) with TD Bank, N.A., in an amount not to exceed \$20.0 million that expires on August 30, 2026 to provide funding for Western Water's Water Pipeline Replacement Program. This revolving line of credit has an interest rate based on a percentage of the Secured Overnight Financing Rate (SOFR) plus a margin based on Western Water's credit rating. The interest rate as of June 30, 2023 was 4.57%. In addition, there is an unutilized fee of 0.20% of the balance of the revolving line of credit remaining after draws against the revolving line of credit. In conjunction with the issuance of the revolving line of credit, the Facilities Authority and Western Water entered into an Agency Agreement, an Installment Purchase Agreement and a Note Purchase and Continuing Covenant Agreement. As of June 30, 2023, and for the year then ended, there was a \$1.0 million draw on the 2022A Revolving Line of Credit.

In January 2024, Western Water initiated an additional draw for \$4.0 million increasing the overall outstanding balance on the 2022A Revolving Line of Credit balance to \$5.0 million.

(8) Interest Rate Swap

Western Water entered into an interest rate swap agreement for the Authority's 2009 Series A Water Revenue Refunding Bonds. In connection with the refunding of the 2009 Series A Bonds, Western Water has amended and restated the swap agreement, with the same counterparty, essentially replacing the 2009 Series A Bonds with the 2012 Series A Bonds with no change in notional amounts. The amended agreement carries over the swap liability of \$7,765,573 from the prior agreement. Western Water subsequently entered the Second Amended and Restated Transaction swap agreement in December 2022 which amended some of the terms and conditions and changed the guarantor. The interest rates remained unchanged.

For fiscal year ended June 30, 2023, the balance of the swap liability is \$2,095,969. The swap liability is amortized as a component of interest expense over the life of the old debt or the new debt, whichever is shorter. Because of the carryover, the new agreement is considered a hybrid instrument for financial reporting, whose pay fixed rate of 2.715% (off-market rate) enables the pay-down of the carryover swap liability.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(8) Interest Rate Swap, continued

Western Water's objective with the swap agreement is to alter its exposure to interest rate fluctuations, specifically rising interest rates that would negatively impact cash flows, by swapping an obligation to pay fixed rates for one that pays a floating rate. The table that follows summarizes the significant swap payment terms:

Description	Summary of Swap Payment Terms	
	District	Counterparty
Original Confirmation Date	November 4, 2008	November 4, 2008
Original Notional Amount	\$ 48,000,000	\$ 48,000,000
First Amended and Restated Date	June 26, 2012	June 26, 2012
Second Amended and Restated Date	December 1, 2022	December 1, 2022
Amended Notional Amount	\$ 43,775,000	\$ 43,775,000
Notional Reductions	Annually on October 1	Annually on October 1
Termination Date	October 1, 2042	October 1, 2042
Payment Dates	First calendar day of each month	First calendar day of each month
Payment Rate	2.715%	67% of one-month USD LIBOR

Evaluation of Swap Effectiveness

Western Water applies the provisions of GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. GASB Statement No. 53 prescribes the accounting and financial reporting required for derivative instruments that hedge identified financial risks. If the derivative instrument is determined to be effective in reducing the identified exposure, hedge accounting provides that changes in the fair value of the hedging instrument—in this instance, the interest rate swap—be reported as either deferred inflows or deferred outflows in a government's statement of net position. To evaluate the effectiveness of the swap, the Synthetic Instrument Method prescribed by GASB Statement No. 53 was employed for the fiscal year ended June 30, 2023. The resulting analyses reveal the swap is effective as a hedging instrument for the fiscal year.

The fair value or marked-to-market value of the swap (imputed at market rate of 1.424%) as of June 30, 2023 is \$2,783,089, which is the amount Western Water would be owed as of this date should the swap be terminated. The change in fair value by \$1,171,220 results in an increase in deferred swap inflow for the year ended June 30, 2023.

Credit Risk

The amended and restated interest rate swap agreement adds a third-party guarantor for any termination payment obligation that may be incurred by the counterparty.

The following tables compare the counterparty and guarantor credit ratings at June 30, 2023 against their threshold rating for termination:

Counterparty	Moody's	S&P
Senior Debt	Aa1	A+
Threshold Amount	A3	A-
Counterparty Guarantor	Moody's	S&P
Senior Debt	A1	NR
Threshold Amount	A3	A-

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(8) Interest Rate Swap, continued

Interest Rate Risk

Western Water is exposed to interest rate risk on its pay-fixed, receive-variable interest rate swap. As Secured Overnight Financing Rate (SOFR) decreases, Western Water's net payment on the swap may increase.

Basis Risk

Western Water is exposed to basis risk on the swap because the variable-rate payments received by Western Water are based on an index other than interest rates Western Water pays on hedged variable rate debt. For the fiscal year ended June 30, 2023, Western Water's 2012 Series A Bonds, which are hedged by the amended swap, had a weighted-average variable rate of 1.905%. Over the same period, the weighted average of 67% of one-month LIBOR was 2.657%. Therefore, Western Water's basis gain over this period was approximately 0.752%. As of June 30, 2023, the current rate on the 2012 Series A Bonds was 2.50%, and the current rate of 67% of one-month LIBOR was 3.487%, resulting in a basis gain of 0.99% for Western Water. Following the permanent cessation of LIBOR on June 30, 2023, the counterparty will make variable payments to Western Water equal to 67% of one-month SOFR plus a spread of 11.448 basis points (bps or 0.11448).

Termination Risk

The swap may be terminated by Western Water or its counterparty if the other party fails to perform under the terms of the contract. If, at the time of termination, the swap is in a liability position, Western Water would be obligated to pay the counterparty the liability position. Western Water has established policies to limit its termination liability payment risk to a predetermined percentage of its available reserves. The swap termination value at June 30, 2023 was within these limits.

(9) Net Investment in Capital Assets

The balance at June 30 consists of the following:

	<u>2023</u>
Capital assets not being depreciated	\$ 146,827,482
Capital assets being depreciated, net	311,642,921
Due to other governmental agencies	(46,243,113)
Bonds payable:	
Bonds	(118,399,695)
Unspent bonds proceeds	10,551,947
Unamortized premium	(25,789,095)
Deferred outflow of resources - debt refunding	7,896,019
Notes payable:	
Notes	(5,086,978)
Unspent notes proceeds	890,117
Lease and subscription-based payables	(1,792,267)
Acquisition and construction of capital assets in accounts payable	(2,629,242)
Net investment in capital assets	<u><u>\$ 277,868,096</u></u>

(10) Defined Benefit Pension Plan

A. General Information about the Pension Plan

Plan Descriptions

The Public Agency Cost-Sharing, Multiple-Employer Defined Benefit Pension Plan (Plan) is administered by CalPERS. The Plan was established to provide retirement, death and disability benefits to public agency rate plans with generally less than 100 active members. A full description of the pension plan regarding number of employees covered, benefit provisions, assumptions (for funding, but not accounting purposes), and membership information are listed in the June 30, 2021 Annual Actuarial Valuation Reports. Details of the benefits provided can be obtained in Appendix B of the actuarial valuation reports. The actuarial valuation reports and CalPERS' audited financial statements are publicly available reports that can be obtained from CalPERS' website under Forms and Publications, at www.calpers.ca.gov.

All qualified permanent and probationary employees are eligible to participate in the Plan, administered by CalPERS. The Plan consists of individual rate plans (benefit tiers) within a safety risk pool (police and fire) and a miscellaneous risk pool (all other). Plan assets may be used to pay benefits for any employer rate plan of the safety and miscellaneous pools. Accordingly, rate plans within the safety or miscellaneous pools are not separate plans under GASB Statement No. 68. Individual employers may sponsor more than one rate plan in the miscellaneous or safety risk pools. Western Water sponsors three rate plans under the miscellaneous risk pool: Miscellaneous rate plan, Miscellaneous Second Tier rate plan and PEPRA Miscellaneous rate plan. Benefit provisions under the Plan are established by State statute and Western Water resolution.

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost-of-living adjustments and death benefits to Plan members who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full-time employment. Members with five years of total service are eligible to retire at age 50 (52 for the PEPRA Miscellaneous rate plan) with statutorily reduced benefits. All members are eligible for non-duty disability benefits after five years of service. The death benefit is one of the following: the Basic Death Benefit, the 1957 Survivor Benefit, or the Optional Settlement 2W Death Benefit. The cost-of-living adjustments for the Plan are applied as specified by the Public Employees' Retirement Law.

The Plan operates under the provisions of the California Public Employees' Retirement Law (PERL), the California Public Employees' Pension Reform Act of 2013 (PEPRA), and the regulations, procedures and policies adopted by the CalPERS Board of Administration. The Plan's authority to establish and amend the benefit terms are set by the PERL and PEPRA, and may be amended by the California state legislature and in some cases require approval by the CalPERS Board.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

A. General Information about the Pension Plan (the Plan), continued

Benefits Provided, continued

Western Water-sponsored rate plans' provisions and benefits in effect at June 30, 2023 are summarized as follows:

	Miscellaneous Rate Plan	Miscellaneous Second Tier Rate Plan	PEPRA Miscellaneous Rate Plan
	Prior to	On or after	On or after
Hire date	January 1, 2013	January 1, 2013	January 1, 2013
Benefit formula	2.5 % @ 55	2% @ 55	2% @ 62
Benefit vesting schedule	5 years service	5 years service	5 years service
Benefit payments	monthly for life	monthly for life	monthly for life
Retirement age	50 - 55	50 - 63	52 - 67
Monthly benefits, as a % of eligible compensation	2.0% to 2.5%	1.426% to 2.418%	1.0% to 2.5%
Required employee contribution rates	8%	7%	6.75%
Required employer contribution rates	12.210%	10.320%	7.470%
Unfunded liability lump-sum payment	\$ 1,822,485	\$ 52,774	\$ 30,214

Contributions

Section 20814(c) of PERL requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through CalPERS' annual actuarial valuation process. For the public agency cost-sharing plan covered by either the miscellaneous or safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. Employer contribution rates may change if plan contracts are amended. For the period ended June 30, 2023, the employer contributions for the respective Western Water-sponsored Miscellaneous rate plan, Miscellaneous Second Tier rate plan and PEPRA Miscellaneous rate plan are \$835,491, \$492,318 and \$484,775, plus respective lump sum payments of \$1,822,485, \$52,774 and \$30,214. Thus, employer contributions made by Western Water to the Plan of the period ended June 30, 2023 is \$3,718,057.

B. Net Pension Liability

The net pension liability for the Plan is measured as the total pension liability, less the pension plan's fiduciary net position. The net pension liability of the Plan is measured as of June 30, 2022, using an annual actuarial valuation as of June 30, 2021 rolled forward to June 30, 2022 using standard update procedures. A summary of principal assumptions and methods used to determine the net pension liability is as follows.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

B. Net Pension Liability, continued

Actuarial Methods and Assumptions Used to Determine Total Pension Liability

For the measurement period ended June 30, 2022 (the measurement date), the total pension liability was determined by rolling forward the June 30, 2021 total pension liability using standard updated procedures. The June 30, 2022 total pension liabilities were based on the following actuarial methods and assumptions:

	<u>Miscellaneous Plan</u>
Valuation date	June 30, 2021
Measurement date	June 30, 2022
Actuarial cost method	Entry Age Normal
Asset valuation method	Market Value of Assets
Actuarial assumptions:	
Inflation	2.30%
Salary increases	Varies by Entry Age and Service
Investment rate of return	6.90%
Mortality	The mortality table used was developed based on CalPERS-specific data. The rates incorporate Generational Mortality to capture ongoing mortality improvement using 80% of Scale MP 2020 published by the Society of Actuaries. For more details, please refer to the 2021 experience study report that can be found on the CalPERS website.
Post-retirement benefit increase	Contract COLA up to 2.30% until Purchasing Power Protection Allowance (PPPA) floor on purchasing power applies.

Changes of benefit terms: none.

Changes of Assumptions: Effective with the June 30, 2021 valuation date (2022 measurement date), the accounting discount rate was reduced from 7.15% to 6.90%. In determining the long-term expected rate of return, CalPERS took into account long-term market return expectations as well as the expected pension fund cash flows. Projected returns for all asset classes are estimated, combined with risk estimates, and are used to project compound (geometric) returns over the long term. The discount rate used to discount liabilities was informed by the long-term projected portfolio return. In addition, demographic assumptions and the inflation rate assumption were changed in accordance with the 2021 CalPERS Experience Study and Review of Actuarial Assumptions.

Discount Rate

The discount rate used by CalPERS to measure the total pension liability for the Public Agency Cost-Sharing Multiple-Employer Plan (PERF C) was 6.90%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

B. Net Pension Liability, continued

Discount rate, continued

In determining the long-term expected rate of return, CalPERS took into account long-term market return expectations as well as the expected pension fund cash flows. Projected returns for all asset classes are estimated and, combined with risk estimates, are used to project compound (geometric) returns over the long term. The discount rate used to discount liabilities was informed by the long-term projected portfolio return.

The expected real rate of return by asset class are as follows:

<u>Asset Class</u>	<u>New Strategic Allocation</u>	<u>Real Return Years 1 - 10^{(1),(2)}</u>
Global Equity - Cap-Weighted	30.0%	4.45%
Global Equity - Non-Cap-Weighted	12.0%	3.84%
Private Equity	13.0%	7.28%
Treasury	5.0%	0.27%
Mortgage-Backed Securities	5.0%	0.50%
Investment Grade Corporates	10.0%	1.56%
High Yield	5.0%	2.27%
Emerging Market Debt	5.0%	2.48%
Private Debt	5.0%	3.57%
Real Assets	15.0%	3.21%
Leverage	(5.0)%	(0.59)%
Total	<u>100.0%</u>	

⁽¹⁾An expected inflation of 2.0% used for this period

⁽²⁾An expected inflation of 2.92% used for this period

Pension Plan Fiduciary Net Position

Information about the pension plan's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fiduciary net position are presented in CalPERS' audited financial statements, which are publicly available reports that can be obtained from CalPERS' website under Forms and Publications at www.calpers.ca.gov. The Plan's fiduciary net position and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis used by the pension plan, which is the economic resources measurement focus and the accrual basis of accounting. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan. Investments are reported at fair value.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

B. Net Pension Liability, continued

Pension Plan Fiduciary Net Position, continued

The plan fiduciary net position disclosed in the GASB 68 accounting valuation report may differ from the plan assets reported in the funding actuarial valuation report due to several reasons. First, for the accounting valuations, CalPERS must keep items such as deficiency reserves, fiduciary self-insurance and pension expense included in fiduciary net position. These amounts are excluded for rate setting purposes in the funding actuarial valuation. In addition, differences may result from early Annual Comprehensive Financial Report closing and final reconciled reserves.

C. Proportionate Share of Net Pension Liability

The following table shows Western Water's proportionate share of the net pension liability over the measurement period.

	Increase (Decrease)		
	Western Water's Total Pension Liability (a)	Western Water's Fiduciary Net Position (b)	Western Water's Net Pension Liability (c) = (a) - (b)
Balance at: 6/30/2021 (MD)	\$ 97,021,938	\$ 85,474,679	\$ 11,547,259
Balance at: 6/30/2022 (MD)	108,234,042	82,193,060	26,040,982
Net Changes during 2021-22	11,212,104	(3,281,619)	14,493,723

MD = Measurement Date

Western Water's net pension liability for the Plan is measured as the proportionate share of the Plan's net pension liability. The net pension liability of the Plan is measured as of June 30, 2022, and the total pension liability for the Plan used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2021 rolled forward to June 30, 2022 using standard update procedures. Western Water's proportion of the net pension liability was based on a projection of Western Water's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined. Western Water's proportionate share of the net pension liability for the Plan as of measurement dates June 30, 2022 and 2021 was as follows:

	Western Water Pension Plan
Proportionate Share - June 30, 2021 (MD)	0.60813%
Proportionate Share - June 30, 2022 (MD)	0.55652%
Change - Increase	(0.05161)%

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

C. Proportionate Share of Net Pension Liability, continued

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents Western Water's proportionate share of the net pension liability for the Plan as of the measurement date, calculated using the discount rate of 6.90%, as well as what the net pension liability would be if it were calculated using a discount rate that is one percentage-point lower (5.90%) or one percentage-point higher (7.90%) than the current rate:

	Discount Rate - 1% (5.90)%	Current Discount Rate (6.90%)	Discount Rate + 1% (7.90)%
Western Water's Net Pension Liability \$	40,795,234	\$ 26,040,982	\$ 13,901,895

Recognition of Gains and Losses

Under GASB 68, gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time.

The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense.

The amortization period differs depending on the source of the gain or loss:

Difference between projected and actual earnings	Five-year straight-line amortization
All other amounts	Straight-line amortization over the average expected remaining service lives of all members that are provided with benefits (active, inactive and retired) as of the beginning of the measurement period

The expected average remaining service lifetime (EARS�) is calculated by dividing the total future service years by the total number of plan participants (active, inactive, and retired) in the Public Agency Cost-Sharing Multiple-Employer Plan (PERF C).

The EARS� for the PERF C for the June 30, 2022, measurement period is 3.7 years, which was obtained by dividing the total service years of 574,665 (the sum of remaining service lifetimes of the active employees) by 153,587 (the total number of participants: active, inactive, and retired). Inactive employees and retirees have remaining service lifetimes equal to zero. Total future service is based on the members' probability of decrementing due to an event other than receiving a cash refund.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(10) Defined Benefit Pension Plan, continued

D. Pension Expense/(Income) and Deferred Outflows and Deferred Inflows of Resources Related to Pensions

As of the start of the measurement period (July 1, 2021), Western Water's proportionate share of the Plan's net pension liability is \$11,547,259 (the net pension liability of the Miscellaneous Risk Pool as of June 30, 2021 is \$1,898,802,581).

For the measurement period ended June 30, 2022 (the measurement date), Western Water incurred pension expense of \$2,487,387 (the pension expense for the risk pool for the measurement period is \$838,081,431).

As of June 30, 2023, Western Water has deferred outflows and deferred inflows of resources related to pensions as follows:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 522,954	\$ (350,252)
Changes of assumptions	2,668,443	-
Net difference between projected and actual earnings on pension plan investments	4,770,017	-
Adjustment due to differences in proportions	322,694	(68,548)
Differences between the employer's contributions and the employer's proportionate share of contributions	-	(669,936)
Pension contributions subsequent to measurement date	3,718,057	-
Total	<u>\$ 12,002,165</u>	<u>\$ (1,088,736)</u>

These amounts above are net of outflows and inflow recognized in the 2021-22 measurement period expense. \$3,718,057 reported as deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the subsequent fiscal year rather than in the current fiscal year. Amounts reported as deferred outflows and deferred inflows of resources related to pension will be recognized in future pension expense as follows:

Measurement Period Ended June 30:	Deferred Outflows/(Inflows) of Resources
2023	\$ 1,926,642
2024	1,551,897
2025	799,327
2026	2,917,506
2027	-
Thereafter	-
Total	<u>\$ 7,195,372</u>

E. Payable to the Pension Plan

At June 30, 2023, Western Water reported a payable of \$147,120 for the outstanding amount of contributions to the pension plan required for the year ended June 30, 2023.

(11) Other Post-Employment Benefits

A. General Information about the OPEB Plan

Plan Description

Western Water is the Plan Administrator for the Western Municipal Water District Retirement Medical Benefits Plan (the Medical Plan). The Medical Plan was established effective June 15, 2006 and is a single employer defined benefit plan to provide advance funding for post-employment healthcare benefits to eligible employees and eligible dependents in accordance with plan provisions. Medical Plan assets are accumulated and benefits are paid from a voluntary employees' beneficiary association (VEBA) trust established by Western Water. Separate financial statements of the VEBA trust may be obtained at Western Municipal Water District, 14205 Meridian Parkway, Riverside, CA 92518.

Benefits Provided

Eligible participants for the Medical Plan are based on three groups:

- a. Group 1 are classified and non-classified employees hired on or before December 18, 2002, who are at least 55 years old at retirement and have completed at least 10 years of service. Western Water provides medical benefits for the employee and spouse/registered domestic partner.
- b. Group 2 are classified and non-classified employees hired after December 18, 2002, who are at least 55 years old at retirement and have completed at least 10 years of service. Western Water provides medical benefits for the employee only.
- c. Group 3 are classified and non-classified employees hired on or after July 1, 2021, who are at least 55 years old at retirement and have completed at least 20 years of service. Western Water provides medical benefits for the employee only.

Employees Covered

As of June 30, 2023, the following employees and former employees were covered by the benefit terms under the plan:

Inactive employees or beneficiaries currently receiving benefit payments	64
Active Employees	152
Total	<u>216</u>

**Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023**

(11) Other Post-Employment Benefits, continued

A. General Information about the OPEB Plan (continued)

Funding Policy and Annual Cost

Contributions

The Medical Plan and its contribution requirement of Western Water is established and may be amended by Western Water's Board of Directors. Western Water contributes to the VEBA trust an amount equal to the actuarially determined contribution at the time of biennial valuation. For the fiscal year ended June 30, 2023, Western Water's total benefit payments of \$119,998 net of estimated implied subsidy of \$119,998, resulted in no cash contributions to the trust.

B. Net OPEB Liability (Asset)

Western Water's net OPEB liability (asset) was measured as of June 30, 2023 and the total OPEB liability used to calculate the net OPEB liability (asset) was determined by an actuarial valuation dated November 1, 2021, that was rolled forward using standard update procedures to determine the June 30, 2023, total OPEB liability. A summary of the principal assumptions and methods used to determine the total OPEB liability is shown below.

Valuation date	11/1/2021
Measurement date	6/30/2023
Actuarial cost method	Entry-age normal cost method
Actuarial assumptions:	
Discount rate	6.80%
Inflation	2.50%
Salary scale	1.50%
Expected long-term investment rate of return	6.80%
Healthcare cost trend rates	Actual premium rates, then 6.0% per annum in fiscal year 2024, decreasing 0.25% per year to an ultimate rate of 4.50% for fiscal year 2030 and later years
Pre-retirement turnover	Derived from CalPERS pension plan
Mortality	Derived from CalPERS pension plan updated to reflect most recent experience study

The actuarial assumptions used in the November 1, 2021 valuation were based on a standard set of assumptions the actuary has used for similar valuations.

The long-term expected rate of return was determined using a building-block method, in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plan's target asset allocation as of June 30, 2023, are summarized in the following table:

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(11) Other Post-Employment Benefits, continued

B. Net OPEB Liability (Asset), continued

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Equity	66.0%	N/A
Fixed income	27.0%	N/A
Real estate	7.0%	N/A
Total	100.0%	6.8%

Discount Rate

The discount rate used to measure the total OPEB liability was 6.8%. The projection of cash flows used to determine the discount rate assumed that Western Water's contributions would be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the Medical Plan's fiduciary net position was projected to be available to make all projected OPEB payments for current active and inactive employees, and beneficiaries. Therefore, the long-term expected rate of return on the Medical Plan's investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

C. Changes in net OPEB Liability (Asset)

The changes in the net OPEB liability (asset) are as follows:

	Increase (Decrease)		
	Total OPEB Liability (a)	Plan Fiduciary Net Position (b)	Net OPEB Liability (Asset) (c) = (a) - (b)
Balance at June 30, 2022	\$ 13,582,803	\$ 20,171,766	\$ (6,588,963)
Changes in the Year:			
Service cost	477,783	-	477,783
Interest on the total OPEB liability	934,353	-	934,353
Differences between actual and expected experience	31,782	-	31,782
Changes in assumptions	-	-	-
Change in benefit terms	-	-	-
Contribution - employer	-	119,998	(119,998)
Contribution - retiree	-	55,904	(55,904)
Net investment income	-	1,655,124	(1,655,124)
Administrative expenses	-	(22,360)	22,360
Benefit payments	(650,905)	(650,905)	-
Net Changes	\$ 793,013	\$ 1,157,761	\$ (364,748)
Balance as of June 30, 2023 (Measurement Date)	\$ 14,375,816	\$ 21,329,527	\$ (6,953,711)

Western Municipal Water District

(11) Other Post-Employment Benefits, continued

C. Changes in net OPEB Liability (Asset), continued

Change in Assumptions

Actuarial assumptions that changed from the prior year include the medical trend rate in 2023 was based on actual premium rates, followed by a 6.0% reset in 2024.

Change in Benefit Terms

There were no changes of benefit terms.

Subsequent Events

There were no subsequent events that would materially affect the results presented in this disclosure.

Sensitivity of the Net OPEB Liability (Asset) to Changes in the Discount Rate

The following presents the net OPEB liability (asset) of Western Water, as well as what Western Water's net OPEB liability (asset) would be if it were calculated using a different rate that is one percentage point lower (5.8%) or one percentage point higher (7.8%) than the current discount rate:

	1% Decrease (5.8)%	Discount Rate (6.8)%	1% Increase (7.8)%
Net OPEB Liability (Asset)	\$ (6,352,419)	\$ (6,953,711)	\$ (9,742,700)

Sensitivity of the Net OPEB Liability (Asset) to Changes in the Healthcare Cost Trend Rates

The following represents the net OPEB liability (asset) of Western Water, as well as Western Water's net OPEB liability (asset) would be if it were calculated using healthcare cost trend rates that are one percentage point lower (5.0%) or one percentage point higher (7.0%) than the current healthcare cost trend rates:

	1% Decrease (5.00)%	Current Healthcare Cost Trend Rates (6.00)%	1% Increase (7.00)%
Net OPEB Liability (Asset)	\$ (10,007,058)	\$ (6,953,711)	\$ (5,981,921)

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(11) Other Post-Employment Benefits, continued

D. OPEB Expense and Deferred Outflows/Inflows of Resources Related to OPEB

For the year ended June 30, 2023, Western Water recognized OPEB expense of \$689,326. At June 30, 2023, Western Water reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred (Inflows) of Resources
Differences between actual and expected experience	\$ 636,083	\$ (7,925,737)
Change of assumptions	1,952,028	(980,909)
Net differences between projected and actual earnings on OPEB plan investments	1,312,818	-
Total	<u>\$ 3,900,929</u>	<u>\$ (8,906,646)</u>

The net difference between projected and actual earnings on plan investments is amortized over a five-year period. The differences between actual and expected experience and change in assumptions are amortized over the expected average remaining service life. The expected average remaining service life for the 2022 to 2023 measurement period is 8.0 years.

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized as OPEB expense as follows:

Year Ending June 30,	Amount
2024	\$ (785,935)
2025	(1,031,023)
2026	(229,975)
2027	(998,126)
2028	(896,845)
Thereafter	<u>(1,063,813)</u>
Total	<u><u>\$ (5,005,717)</u></u>

E. Payable to the OPEB Plan

At June 30, 2023, Western Water had no outstanding amount of contributions to the OPEB plan required for the year ended June 30, 2023.

Western Municipal Water District
Notes to the Basic Financial Statements

(12) Risk Management

Western Water is exposed to various risks of loss including, but not limited to torts, theft of, damage to and destruction of assets, errors and omissions, injuries to employees, and natural disasters. Western Water is a member of the Association of California Water Agencies/Joint Powers Insurance Authority (JPIA), an intergovernmental risk-pooling self-insurance authority, created under the provisions of California Government Code Sections 6500 et. seq. The purpose of JPIA is to arrange and administer programs of insurance for the pooling of self-insured losses and to purchase excess insurance coverage. At June 30, 2023, Western Water participated in the following self-insurance and purchased insurance programs with JPIA:

- General, automobile, employment practices & public officials' liability: Broad coverage against third-party claims for Western Water, its directors, employees, and volunteers. Covered up to the following limits: the JPIA pools for first \$5,000,000 and purchases excess coverage limits to \$55,000,000 with aggregated policy limits.
- Property loss: Insured up to replacement value with a \$50,000 deductible per occurrence on scheduled buildings, fixed equipment and contents. Actual cash value on scheduled mobile equipment with a \$25,000 deductible per occurrence, and actual cash value on scheduled vehicles with a \$25,000 per occurrence. JPIA is self-insured up to \$10,000,000 per loss and has purchased re-insurance coverage up to a \$500,000,000 limit per occurrence. Scheduled fixed equipment is covered for accidental mechanical breakdown up to a sub-limit of \$100,000,000 with a deductible of \$25,000 to \$50,000 depending on the type of equipment. The property program also includes earthquake coverage with an aggregate limit of \$2,500,000, with a deductible equal to 5% of Western Water's total insurable values affected in a loss, subject to a minimum of \$75,000, and flood coverage with an aggregate limit up to \$25,000,000 and a sub-limit of \$10,000,000 for Flood Zones A or V, with a \$100,000 deductible.
- Workers' compensation: Insured for employer's liability for job-related injury or disease with a \$4,000,000 program aggregate limit. JPIA pools the first \$2,000,000 and purchases excess coverage for California statutory limits up to a \$4,000,000 program aggregate limit.
- Cyber liability: Including cyber security up to \$2,000,000 per member and \$5,000,000 aggregate limit. Cyber liability is subject to a \$100,000 deductible.
- Employee dishonesty/Crime Supplement: Insured up to \$100,000 per occurrence with a \$1,000 deductible for employee dishonesty, computer fraud, and forgery or alteration. An excess crime program provides a coverage/limit up to \$1,000,000 per occurrence with a \$100,000 deductible. The program covers all employees and the Board of Directors.
- Fiduciary liability: Insured up to \$1,000,000 per occurrence and \$1,000,000 aggregate limit with sub-limits of \$100,000 and \$250,000 for certain coverages. Fiduciary liability is subject to a \$50,000 deductible.

In addition, Western Water has purchased Pollution and Remediation Legal Liability insurance through an independent insurance company that provides coverage of \$2,000,000 per occurrence and a \$10,000,000 aggregate. Coverage includes pollution conditions for water supply and biosolids, sewer backup, mold, remediation, emergency response cost, on-site clean-up cost, third-party claims for off-site clean-up, and transportation pollution liability, with a \$100,000 deductible.

Settled claims have not exceeded any coverage amounts in any of the last three fiscal years. Cyber liability coverage was decreased from \$3.0 million to \$2.0 million coverage per member during the year ended June 30, 2023.

Western Municipal Water District
Notes to the Basic Financial Statements

(13) Leases

Western Water has adopted the following policies to account for agreements in accordance with the requirements of GASB Statement No. 87 (unless otherwise specified, the following policies pertain to agreements in which Western Water is lessee, and agreements in which Western Water is lessor):

Basis of Lease Classification

In accordance with GASB No. 87, Western Water does not recognize a lease receivable and a deferred inflow of resources for short-term leases. Short-term leases are certain leases that, at the commencement of the lease term, has a maximum possible term under the lease contract of 12 months (or less), including any options to extend, regardless of their probability of being exercised.

Term

At the time of commencement or conversion, the term of the lease will include possible extension periods that are deemed to be reasonably certain given all available information, regarding the likelihood of renewal.

Discount Rate

Unless explicitly stated in the lease agreement, known by Western Water, or Western Water is unable to determine the rate implicitly within the lease, the discount rate used to calculate lease right-of-use assets and liabilities and related lease receivable is Western Water's incremental borrowing rate at the end of each fiscal year. The incremental borrowing rate was between 3.25% and 8.00% as of June 30, 2023, and corresponding discount rate was utilized for applicable leases in fiscal year 2023.

Variable Payments

Variable payments based on the future performance of the lessee or lessor or usage of the underlying asset are not included in the measurement of lease assets or liabilities. For the fiscal year ended June 30, 2023, all leases are based on fixed payments and do not have variable payment components.

Remeasurement

For the fiscal year ended June 30, 2023, Western Water did not have to remeasure any lease liabilities due to 1) early termination of leases, 2) reduction in monthly lease payment, or 3) change in borrowing rate.

(13) Leases, continued

Western Water as Lessee

Vehicle Leases

Western Water has entered into various vehicle agreements with lease terms expiring between 2023 to 2027. As of June 30, 2023, Western Water has recognized right to use assets of \$1,033,394 and lease liabilities of \$1,048,767, related to these agreements. During the fiscal year, Western Water recorded \$280,823 in amortization expense.

Land Lease

Western Water has entered into an agreement to lease land from the Metropolitan Water District with the lease term expiring in 2061. As of June 30, 2023, Western Water has recognized a right to use asset of \$472,446 and a lease liability of \$482,126 related to this agreement. During the fiscal year, Western Water recorded \$12,769 in amortization expense.

Western Water amortized the right to use assets as follows during the fiscal year:

	Balance at 6/30/2022	Additions	Deletions	Balance at June 30, 2023
Leased assets:				
Land	\$ 497,984	\$ -	\$ -	\$ 497,984

2059-2061	6,260
Total	<u>\$ 703,302</u>

(14) Subscription-Based Information Technology Arrangements (SBITA)

Western Water utilizes IT software contracts to purchase all software, including a variety of software products that are installed on servers, workstations, mobile devices, notebooks, and other hardware. These software products include enterprise software licensing and subscription agreements, cloud data warehousing, e-procurement system services as well as various technology security and geographical mapping imagery. In many cases, Western Water is required to purchase the annual licenses for these products to obtain functional and security updates as well as maintenance support services.

Western Water evaluates these contracts and identifies the qualified SBITAs in accordance with GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*. The present value of the SBITAs, calculated based on the incremental borrowing rate discussed below, are aggregated on a portfolio basis. Western Water has adopted the following policies to account for agreements in accordance with the requirements of GASB No. 96.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(14) Subscription-Based Information Technology Arrangements (SBITA), continued

Basis of SBITA classification

In accordance with GASB No. 96, Western Water recognizes short-term subscription payments, which have a maximum possible term under the SBITA contract of 12 months or less, as outflows of resources based on the payment provisions of the contract.

For purposes of determining the applicability of GASB No. 96, Software as a Service, Platform as a Service, and Infrastructure as a Service are three common deployment models of cloud computing arrangements. Each deployment model may contain IT software used in combination with tangible capital assets. The substance of the arrangement is evaluated by Western Water in accordance with GASB No. 96 to determine whether the arrangement meets the definition of SBITA.

Term

At the time of the SBITA commencement or conversion, the term will include possible extension periods that are deemed to be reasonably certain given all available information, regarding the likelihood of renewal. For extension periods without explicit rent payment amounts in the agreement, Western Water will assume a CPI increase applicable to the western Riverside area for the fiscal year to prior payment amounts on an annual basis. No such assumptions were required in fiscal year 2023.

Discount rate

Unless explicitly stated in the agreement, known by Western Water, or Western Water is able to determine the rate implicit within the agreement, the discount rate used to calculate the right-to-use subscription IT assets and liabilities is Western Water's incremental borrowing rate at the time the SBITA is entered into.

Variable payments

Variable payments based on the future performance of the agreement or usage of the underlying IT asset are not included in the measurement of subscription IT assets or liabilities. For the fiscal year ended June 30, 2023, Western Water reported two SBITA arrangements for payroll processing and utility bill online and phone payment processing per the variable payment component. SBITA variable expenses range from \$4,000 to \$28,000 per month based on the number of employee payments processed or a percentage of the amount of payments received online or via phone. For the year ended June 30, 2023, Western Water recorded \$332,991 of SBITA variable based payments as administrative and general expenses.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(14) Subscription-Based Information Technology Arrangements (SBITA), continued

Variable payments, continued

The total amount of subscription IT assets and the related accumulated amortization for the year ended June 30, 2023 is as follows:

	Balance at June 30, 2022	Additions	Deletions	Balance at June 30, 2023
Subscription assets:				
Right to use subscription assets-in-progress	\$ 567,774	\$ 848,489	\$ -	\$ 1,416,263
Right to use subscription assets	-	318,581	-	318,581
Total subscription assets	567,774	1,167,070	-	1,734,844
Less accumulated amortization on subscription assets:				
Right to use subscription assets	-	(17,699)	-	(17,699)
Total accumulated amortization on subscription assets	-	(17,699)	-	(17,699)
Subscription assets, net	\$ 567,774	\$ 1,149,371	\$ -	\$ 1,717,145

Future principal and interest payments to be made under these SBITAs for each of the next five years and in five-year increments thereafter (if applicable) are as follows:

Years ended June 30,	Principal	Interest	Total
2024	\$ 44,525	\$ 19,326	\$ 63,851
2025	48,101	15,750	63,851
2026	51,964	11,887	63,851
2027	56,138	7,714	63,852
2028	60,646	3,205	63,851
	<u>\$ 261,374</u>	<u>\$ 57,882</u>	<u>\$ 319,256</u>

(15) Commitments and Contingencies

Joint Ventures

Western Water participates in the following joint ventures with other districts and agencies for various water and wastewater projects and operating facilities in Southern California:

Notes to the Basic Financial Statements
June 30, 2023

(15) Commitments and Contingencies, continued

Joint Ventures, continued

Chino Basin Desalter Authority

Western Water joined the Chino Basin Desalter Authority (CDA) in November 2008 and became a voting member of the CDA on September 22, 2011, through a facility buy-in contribution of \$3,163,712. Working in partnership with two CDA partners, the City of Ontario and Jurupa Community Services District (JCSD), Western Water is augmenting water supplies from the Chino Basin by expanding the capacity of the Chino II Desalter from 12 MGD to 22 MGD. As expansion partners, Western Water, the City of Ontario and JCSD are responsible for funding the remaining cost of the \$155 million project, net of grants. Western Water's total share of the project is about \$64 million reduced by about \$33 million in grant funding, for a net cost of \$31 million excluding Western Water's internal costs and capitalized interest. Western Water's share of costs incurred to date, including Western Water's internal costs and capitalized interest, is \$72 million as of June 30, 2023. Western Water's participation in the CDA is accounted for as a joint venture without an equity interest. Western Water's share of the expansion cost was capitalized throughout construction, including capacity rights of 3,534 acre-feet of water annually.

Separate financial statements may be obtained at the Chino Basin Desalter Authority, 2151 S. Haven Avenue, Suite 202, Ontario, CA 91761.

Audited financial information for the operation of the CDA for the fiscal year ended June 30, 2023 is as follows:

Total assets	<u>\$ 306,018,270</u>
Total deferred outflows of resources	<u>\$ 3,050,336</u>
Total liabilities	<u>\$ 68,570,453</u>
Total net position	<u>\$ 240,498,153</u>
Total revenues	\$ 82,890,022
Total expenses	<u>(79,571,002)</u>
Change in net position	<u>\$ 3,319,020</u>

Western Riverside County Regional Wastewater Authority (WRCRWA)

WRCRWA was formed in 1992 pursuant to the provisions of Article 1, Chapter 5, Division 7, Title 1 of the Government Code of the State of California relating to the joint exercise of powers common to public agencies for the purpose of constructing, maintaining, operating and managing facilities for the collection, transmission, treatment and disposal of wastewater, the reclamation of wastewater, and the use of reclaimed wastewater for any beneficial purpose.

The five-member agencies are the Home Gardens Sanitary District, Western Water, the City of Norco, the City of Corona and JCSD. WRCRWA is governed by a 10-member Board of Directors. Western Water's participation in WRCRWA is accounted for as a joint venture without an equity interest.

Notes to the Basic Financial Statements
June 30, 2023

(15) Commitments and Contingencies, continued

Joint Ventures, continued

Western Riverside County Regional Wastewater Authority, continued

WRCRWA owns and operates a tertiary wastewater treatment plant in Riverside County. In 2018, WRCRWA completed an expansion of the plant from an 8.0 MGD to a 14.0 MGD treatment capacity. The member agencies support the operating costs and capital costs through fixed and variable rates established by WRCRWA's Board of Directors. At June 30, 2023, the carrying value of Western Water's capacity rights in WRCRWA is \$8.3 million, net of accumulated amortization. The capacity rights in WRCRWA are being amortized over the term of the WRCRWA joint exercise of powers agreement.

The plant's treatment capacity is owned by member agencies as follows:

Member Agencies	MGD
Western Municipal Water District	1.93
Jurupa Community Services District	6.00
City of Norco	2.70
Home Gardens Sanitary District	0.75
City of Corona	2.62
	<u>14.00</u>

The plant expansion was financed by all member agencies, including a portion from Western Water for certain expenses that primarily deal with odor control. Western Water's participation in the plant expansion did not result in additional allocated capacity to Western Water. The table above reflects plant treatment capacity among the member agencies as a result of the plant expansion.

Unaudited financial information for the operation of WRCRWA for the fiscal year ended June 30, 2023 is as follows:

Total assets	\$ 122,248,359
Total liabilities	\$ 60,266,602
Total deferred inflow of resources	\$ 949,111
Total net position	\$ 61,032,646
Total revenues	\$ 24,307,404
Total expenses	(16,098,557)
Change in net position	\$ 8,208,847

Since July 1, 1998, Western Water has been responsible for the administration and operations of WRCRWA. Separate financial statements of WRCRWA may be obtained at Western Municipal Water District, 14205 Meridian Parkway, Riverside, CA 92518.

(15) Commitments and Contingencies, continued

Joint Ventures, continued

Santa Ana Watershed Project Authority (SAWPA)

SAWPA was formed under a joint exercise of powers agreement for the purpose of undertaking projects for water quality control and protection in the Santa Ana River Watershed. SAWPA is composed of five water agencies within the watershed area: Eastern Municipal Water District, Orange County Water District, San Bernardino Valley Municipal Water District, Western Water and the Inland Empire Utilities Agencies. Each participating agency appoints two commissioners to SAWPA to form an oversight committee of 10. Equal contributions are made by each member agency for administration and contributions based on capacity use rights for project agreements under which capital construction is accomplished. Special projects or studies are funded by contributions based on the general or specific nature of the project or study. Western Water's participation in SAWPA is accounted for as a joint venture without an equity interest. At June 30, 2023, the carrying value of Western Water's capacity rights in SAWPA is \$18.7 million. The capacity rights in SAWPA were determined to have an indefinite useful life and are not being amortized. Financial data may be obtained at Santa Ana Watershed Project Authority, 11615 Sterling Avenue, Riverside, CA 92503.

Unaudited financial information for the operation of SAWPA for the fiscal year ended June 30, 2023 is as follows:

Total assets	<u>\$ 171,200,975</u>
Total deferred outflow of resources	<u>\$ 2,984,563</u>
Total liabilities	<u>\$ 93,907,955</u>
Total deferred inflow of resources	<u>\$ 289,195</u>
Total net position	<u>\$ 79,988,388</u>
Total revenues	\$ 29,006,332
Total expenses	(27,671,304)
Change in net position	<u>\$ 1,335,028</u>

Santa Rosa Regional Resources Authority (SRRRA)

SRRRA was formed under a joint exercise of powers agreement for the purpose of constructing, maintaining, operating and managing facilities for the collection, transmission, treatment and disposal of wastewater, the reclamation of wastewater, and the use of reclaimed wastewater for any beneficial purpose.

SRRRA comprises three-member agencies: Elsinore Valley Municipal Water District, Rancho California Water District, and Western Water. SRRRA is governed by a three-member Board of Directors. Western Water's participation is accounted for as a joint venture without an equity interest.

In 2018, SRRRA completed the acquisition of the SRWRF, a 5.0 MGD secondary and tertiary plant, from Rancho California Water District. Wastewater flows in SRRRA's service area are treated at the SRWRF. At June 30, 2023, the carrying value of Western Water's capacity rights in SRRRA is \$10.7 million. Financial data may be obtained at Rancho California Water District, 42135 Winchester Road, Temecula, CA 92590.

General Litigation

Western Water is subject to various claims covering a wide range of matters that arise in the ordinary course of business. Management believes that any liability that may ultimately result from the resolution of these matters has already been accrued as of June 30, 2023.

Western Municipal Water District
Notes to the Basic Financial Statements
June 30, 2023

(16) Implementation of New Accounting Principles

Adopted in the Current Year

The GASB issued Statement No. 96, *Subscription-Based Information Technology Arrangements*. This statement requires recognition of certain subscription-based information technology arrangements (SBITAs) assets and liabilities for SBITAs and recognizes outflows of resources based on the payment provisions of the contract. It establishes a single model for SBITA accounting based on the foundational principle that SBITAs are financings of the right to use an underlying information technology (IT) asset. Under this statement, a lessee government is required to recognize a SBITA liability and an intangible right to use lease asset, thereby enhancing the relevance and consistency of information about subscription-based activities. The requirements of this statement are effective for Western Water's fiscal year ended June 30, 2023. Western Water is in compliance with the implementation of this statement and retroactively restated net position as follows:

Net position at June 30, 2022, as previously reported	\$497,673,000
Add capital assets, intangible – right of use at June 30, 2022*	0
Less SBITA liabilities at June 30, 2022*	<u>(0)</u>
Net position at June 30, 2022, as restated	<u>\$497,673,000</u>

*Western Water did not have any SBITA's in effect as of June 30, 2022. However, Western Water did have two SBITA's in the implementation stage and reclassified \$567,774 from construction-in-progress to right to use subscription assets-in-progress as of June 30, 2022. As a result of this reclassification, there was no effect to beginning net position.

GASB Statement No. 91, *Conduit Debt Obligations*. This Statement clarifies the existing definition of a conduit debt obligation; establishes that a conduit debt obligation is not a liability of the issuer; establishes standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improves required note disclosures. There was no impact to Western Water as a result of implementing this statement.

GASB Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*. This statement defines a Public-Private and Public-Public Partnerships (PPP) as an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or exchange-like transaction. Some PPPs meet the definition of a service concession arrangement (SCA) in which (1) the operator collects and is compensated by fees from third parties; (2) the transferor determines or has the ability to modify or approve which services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the services; and (3) the transferor is entitled to significant residual interest in the service utility of the underlying PPP asset at the end of the arrangement. This statement also provides guidance for accounting and financial reporting for availability payment arrangements (APAs). An APA is an arrangement in which a government compensates an operator for services that may include designing, constructing, financing, maintaining, or operating an underlying nonfinancial asset for a period of time in an exchange or exchange-like transaction. There was no impact to Western Water as a result of implementing this statement.

Western Municipal Water District
Notes to the Basic Financial Statements

(16) Implementation of New Accounting Principles, continued

Adopted in the Current Year, continued

GASB Statement No. 99, *Omnibus 2022*. This statement provides clarification on previously issued statements including classification and reporting of derivative instruments within the scope of Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*, that do not meet the definition of either an investment derivative instrument or a hedging derivative instrument, clarification of provisions in Statement No. 87, *Leases*, as amended, related to the determination of the lease term, classification of a lease as a short-term lease, recognition and measurement of a lease liability and a lease asset, and identification of lease incentives, clarification of provisions in Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*, related to (a) the determination of the public-private and public-public partnership (PPP) term and (b) recognition and measurement of installment payments and the transfer of the underlying PPP asset, clarification of provisions in Statement No. 96, *Subscription-Based Information Technology Arrangements*, related to the SBITA term, classification of a SBITA as a short-term SBITA, and recognition and measurement of a subscription liability, extension of the period during which the London Interbank Offered Rate (LIBOR) is considered an appropriate benchmark interest rate for the qualitative evaluation of the effectiveness of an interest rate swap that hedges the interest rate risk of taxable debt, accounting for the distribution of benefits as part of the Supplemental Nutrition Assistance Program (SNAP), disclosures related to nonmonetary transactions, pledges of future revenues when resources are not received by the pledging government, clarification of provisions in Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, as amended, related to the focus of the government-wide financial statements, terminology updates related to certain provisions of Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*, and terminology used in Statement No. 53 to refer to resource flows statements. There was no impact to Western Water as a result of implementing this statement.

Effective in Future Years

The GASB has issued pronouncements that may impact future financial reporting presentations. Management has not currently determined the impact, if any, of the following newly issued pronouncements:

- GASB Statement No. 100, *Accounting Changes and Error Corrections – an amendment of GASB Statement No. 62*, effective for Western Water's fiscal year ending June 30, 2024.
- GASB Statement No. 101, *Compensated Absences*, effective for Western Water's fiscal year ending June 30, 2025.
- GASB Statement No. 102, *Certain Risk Disclosures*, effective for Western Water's fiscal year ending June 30, 2025.

(17) Subsequent Events

On August 31, 2023, Western Water entered into an agreement with Elsinore Valley Municipal Water District (Elsinore) for the purchase and sale of service rights in the Mills Pipeline to Elsinore. Per the agreement, Elsinore will receive two options to purchase 12 cubic feet per second (cfs) in the Mills Pipeline with 6 cfs purchased effective August 31, 2023 and the option for the other 6 cfs to be purchased before December 31, 2024. The 6 cfs sale of service rights by Western Water to Elsinore is for \$8,167,881 payable to Western Water in installments of \$555,178 annually on October 1st over 18 years at an annual rate of 2.5% with the loan receivable maturing on October 1, 2040. Western Water received the first payment on October 1, 2023 for \$555,178.

Changes of Assumptions

Effective with the June 30, 2021 valuation date (2022 measurement date), the accounting discount rate was reduced from 7.15% to 6.90%. In determining the long-term expected rate of return, CalPERS took into account long-term market return expectations as well as the expected pension fund cash flows. Projected returns for all asset classes are estimated, combined with risk estimates, and are used to project compound (geometric) returns over the long term. The discount rate used to discount liabilities was informed by the long-term projected portfolio return. In addition, demographic assumptions and the inflation rate assumptions were changed in accordance with the 2021 CalPERS Experience Study and Review of Actuarial Assumptions. In 2018, demographic assumptions and inflation rate were changed in accordance to the CalPERS Experience Study and Review of Actuarial Assumptions in December 2017. In 2017, the accounting discount rate was reduced from 7.65% to 7.15%. In 2015, the discount rate changed from 7.5% (net of administrative expense in 2014) to 7.65% to correct the adjustment, which previously reduced the discount rate for administrative expense.

June 30, 2023**

Changes of Assumptions

In 2022, 1) the discount rate was changed from 7.0% to 6.8%, 2) the expected long-term investment rate of return was changed from 7.0% to 6.8%, and 3) the medical trend rate table was reset in fiscal year 2023. In 2021, the salary scale was changed from 3.0% to 1.50%, and the medical trend rate table was reset in fiscal year 2022. In 2020, the salary increase rate was changed from 5.7% to 3.0%, and the medical trend rate table was reset in fiscal year 2021. In 2019, 1) the salary increase rate was changed from 3.0% to 5.7%, 2) spousal coverage assumption was changed from 85% to 60%, and 3) the medical trend rate table was reset in fiscal year 2020.

Required Supplementary Information
June 30, 2023**

**Schedule of OPEB Contributions
Last 10 Years***

	2023	2022	2021	2020	2019	2018
Actuarially determined contribution	\$ 119,998	\$ 851,933	\$ 793,304	\$ 926,132	\$ 852,704	\$ 671,838
Actual employer contribution	119,998	851,933	793,304	926,132	852,704	671,838
Contribution deficiency (excess)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>
Covered payroll	\$ 18,369,788	\$ 17,632,348	\$ 17,369,367	\$ 16,473,446	\$ 14,957,485	\$ 13,685,044
Contributions as a percentage of covered payroll	0.65%	4.83%	4.57%	5.62%	5.70%	4.91%

*Fiscal year 2022 to 2023 was the sixth year of implementation; therefore, only six years are shown.

Methods and assumptions used to determine contributions

Actuarial cost method	Entry age normal
Asset valuation method	Fair value of assets
Discount rate	6.80%
Inflation	2.50%
Salary scale	1.50%
Investment rate of return	6.80%
Healthcare cost trend rates	Actual premium rates, then 6.0% per annum in fiscal year 2024, decreasing 0.25% per year to an ultimate rate of 4.50% for fiscal year 2030 and later years
Retirement age	55 years
Mortality	Derived from CalPERS pension plan updated to reflect most recent experience study

STATISTICAL SECTION

ANNUAL COMPREHENSIVE
FINANCIAL REPORT
2022-23

This Page Intentionally Left Blank

Statistical Section

This part of Western Water's annual comprehensive financial report presents detailed information as a context for understanding what the information in the accompanying basic financial statements and notes to the basic financial statements says about Western Water's overall financial health.

Contents

Financial Trends

These schedules contain trend information to help the reader understand how Western Water's financial performance and well-being have changed over time.

Revenue Capacity

These schedules contain information to help the reader assess the factors affecting Western Water's ability to generate revenues.

Debt Capacity

These schedules present information to help the reader assess the affordability of Western Water's current levels of outstanding debt and Western Water's ability to issue additional debt in the future.

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which Western Water's financial activities take place and to help make comparisons over time and with other agencies.

Operating Information

These schedules contain information about Western Water's operations and resources to help the reader understand how Western Water's financial information relates to the services Western Water provides and the activities it performs.

2014	105,675,122	120,416,071	(14,740,949)	16,810,158	2,069,209	11,775,913	13,845,122

⁽¹⁾ See Table III for details of revenues.

⁽²⁾ See Table IV for details of expenses.

⁽³⁾ Capital contributions include water and sewer added facilities charges (capacity charges) and contributed assets from developers, as well as grant proceeds. Being dependent on the development interest within the retail service area, these amounts naturally fluctuate from year to year.

⁽⁴⁾ Balance was restated for a correction of grant revenue recognition error.

Note: The water meter and water rate information shown is for domestic customers (i.e., non-agricultural) residing in Western Water's retail service area that has the vast majority of customers (Riverside service area, Power Zone 1).

⁽¹⁾ The usage charge shown is for an average monthly treated water consumption of 29 units. A unit is 100 cubic feet of water or 748 gallons. In FY 2023, an average customer with a ¾-inch water meter will pay \$129.01 per month (\$37.36 fixed + \$91.65 usage).

⁽²⁾ The sewer rate information shown is for one EDU (equivalent dwelling unit) in Western Water's Lake Hills area.

⁽³⁾ There were no rate changes effective in Fiscal Year 2021.

⁽⁴⁾ Water and sewer rates were increased effective January 1, 2020 and October 1, 2019, respectively.

⁽¹⁾ Excludes assessed valuation of additional fringe areas of Western Water.

⁽²⁾ The percentage of overlapping debt applicable to Western Water is estimated using taxable assessed property value. Applicable percentages were estimated by determining the portion of the overlapping Western Water's assessed value that is within the boundaries of Western Water divided by Western Water's total taxable assessed value.

⁽³⁾ Excludes tax and revenue anticipation notes, enterprise revenue, mortgage revenue and non-bonded capital lease obligations. Qualified Zone Academy Bonds are included based on principal due at maturity.
